**Subject:** Updates to the Director's Technical Rules for Source Protection under the Clean Water Act

**SENT ON BEHALF OF KIRSTEN CORRIGAL, DIRECTOR, CONSERVATION AND SOURCE PROTECTION BRANCH**

**Good Day All:**

I am writing to inform you that the Ministry of the Environment, Conservation and Parks has posted a policy decision on the Environmental Registry of Ontario amending the technical rules for assessing source water protection vulnerability and risk under the *Clean Water Act, 2006*.

These updates will help ensure that source water protection efforts are supported by current science and that the quality of Ontario's drinking water continues to be protected, as committed to in the Made-in-Ontario Environment Plan.

Many of you had an opportunity to provide input on these updates through working groups and interactive sessions over the past couple of years, as well as through the proposal on the Environmental Registry. I would like to thank you for your feedback and contributions, which have been invaluable in developing and refining the updates.

The updated technical rules are posted to the Environmental Registry of Ontario (English: <https://ero.ontario.ca/notice/019-2219>; French: <https://ero.ontario.ca/fr/notice/019-2219>).

Sincerely,

Kirsten Corrigan, Director  
Conservation and Source Protection Branch
