

Township of Brock Fire Department

2017-2021
Activity Report

MISSION STATEMENT

The Brock Township Fire Department is a team of highly trained and dedicated firefighters, it is our mission to provide the highest standard of service to all those who may seek our help. Through public fire safety education, fire safety standards, enforcement and emergency response, the department is committed to safely protecting the lives, property and environment of Brock Township.

VISION STATEMENT

To provide the citizens of Brock Township with a safe, progressive, innovative and proactive Fire Department. Through a unified forward-thinking organization, we will create a commitment to excellence through professionalism, honesty, integrity and respect for our customers and each other.

Message from Fire Chief Rick Harrison

Your Worship Mayor John Grant and Members of Council, I am very pleased to provide you with the Brock Township Fire Department Activity Report. It has been a few years since our last report and for that reason we have included information gathered over the past 5 years.

As I look back on all the accomplishments, I am extremely proud of the commitment to the citizens of this Township that is demonstrated every day by all fire department personnel. The dedication and commitment are so evident when we are called upon to perform the multitude of emergency and non-emergency services that we deliver to the citizens of our great Township.

The fire department, with the support of Council, have made many improvements to the fire department to keep our firefighters and public safe. In the past 7 years the fire department has purchased 5 new fire trucks, 2 admin vehicles, upgraded our auto-extrication equipment, modernized several other pieces of equipment and we continue, annually, to upgrade firefighter personal protective equipment.

The pandemic caused everyone's world to be turned upside down. The fire department were faced with many challenges, but with the cooperation of the firefighters we managed to do our best in keeping everyone healthy, safe and continued to manage the day to day operations of the fire department. The support of the firefighters proved to be a great asset in getting us through a very tough time.

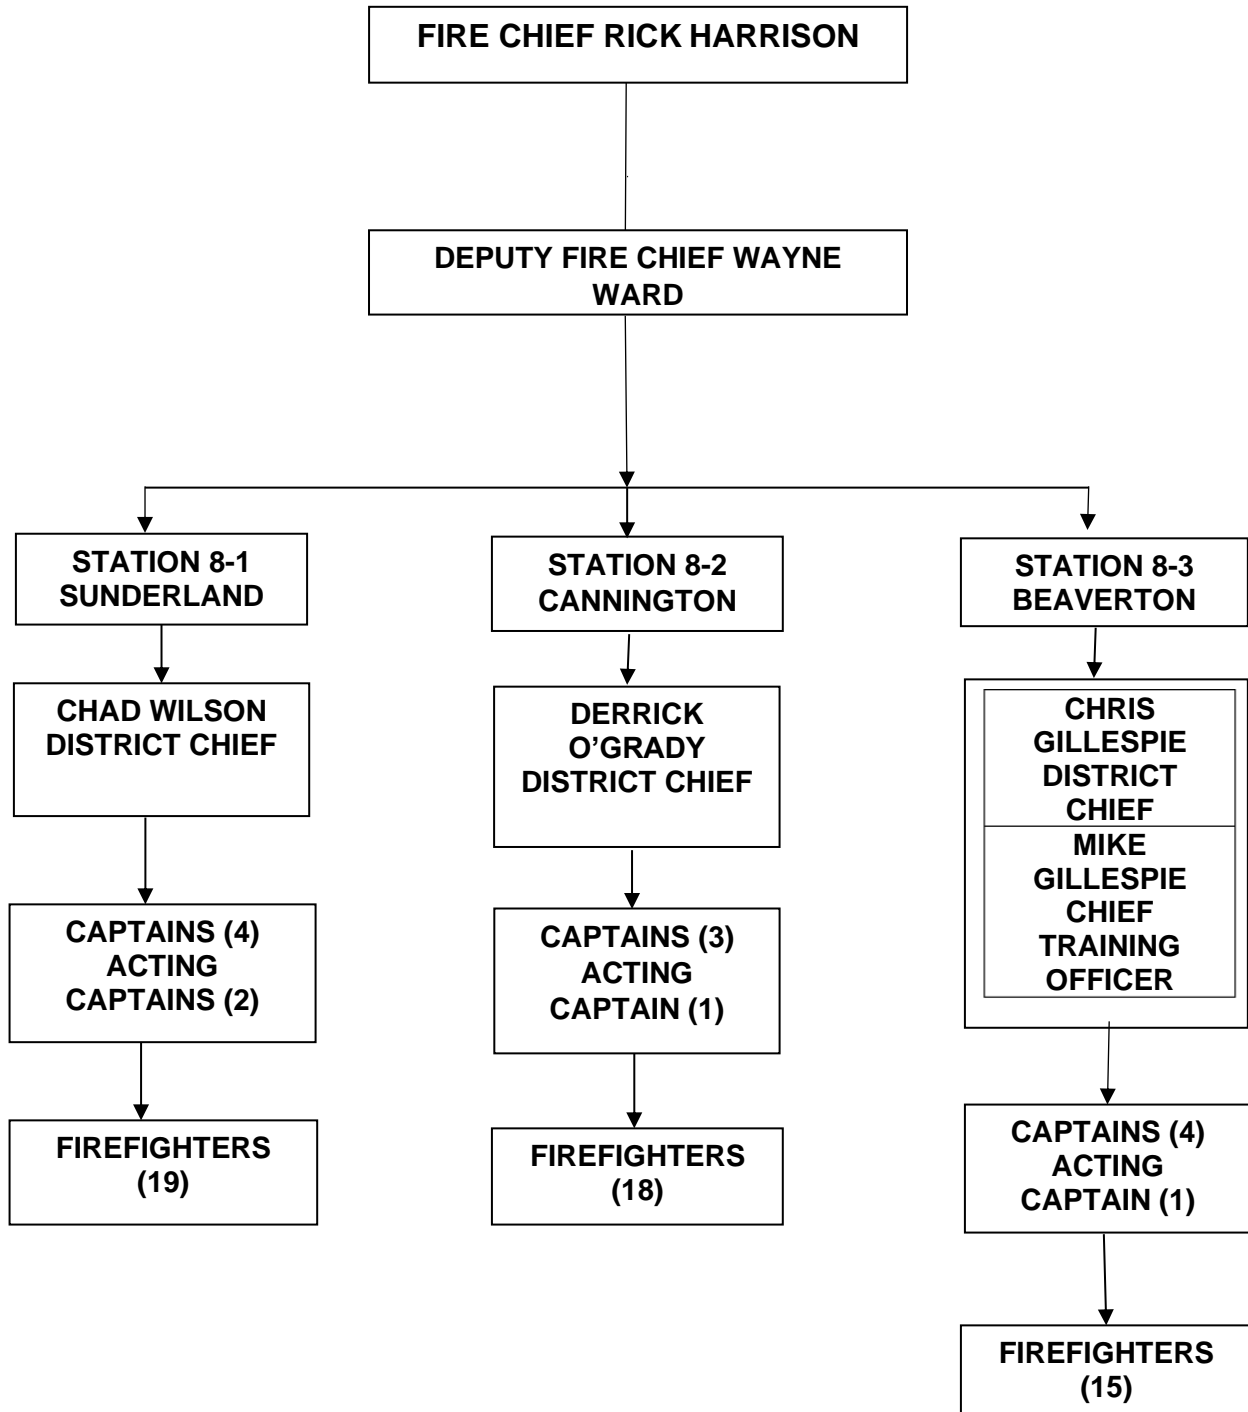

As we all know, the Township is growing, therefore it is very important for the fire department to be proactive to meet the needs of the public and fire department personnel in our quest of safety for all. In our continued effort to be proactive, in 2021 Council approved the purchasing of a 110' Ascendent Aerial Platform Truck. This truck, due to be delivered June 2022, will be a huge operational asset for our fire department and will serve the public and the firefighters well for many years to come.

The continued support of Council, CAO and the Senior Team is greatly appreciated and acknowledged as we continue our quest to provide the very best emergency service, fire prevention and public education programs to the residents we serve.

In closing, I say, "Thank You" and ask that the Mayor and Members of Council continue to be proactive in delivering all aspects of the Fire Protection and Prevention Act with Pride, Professionalism and Prevention.

Fire Prevention ---Public Safety & Public Education

The goal of the Fire Prevention Division is to provide two lines of defense to our citizens: Fire Safety through Public Education and Fire Prevention through inspections and code enforcement. The Fire Prevention Division is responsible for inspections arising from complaints, requests, retrofits, or self-initiated in accordance with the Fire Protection and Prevention Act and Fire Department policies.

The Fire Prevention Division is also responsible for fire scene investigations, fire cause determination and assisting with the training of firefighters and Municipal staff.

The Fire Prevention Division continues working diligently in the completion of all primary inspections of commercial, mercantile and assembly occupancies within the Township. The Division has completed 95% of these types of inspections and we continue to move forward with conducting re-inspections of these properties in the early stages of our Fire Prevention program.

As Deputy Fire Chief for the Township of Brock Fire Department I am very proud of the many accomplishments we have achieved providing education to the residents and visitors of Brock Township.

Deputy Fire Chief Wayne Ward

Pride, Professionalism, Prevention

Public Education

Public Fire Safety education is an important component of the fire department to increase awareness of the need for smoke alarms, carbon monoxide alarms and home escape planning, thus reducing the risk and impact of fires in our municipality.

Smoke Alarm Program

The purpose of our smoke alarm program is to distribute fire safety and emergency planning literature to the residents of our municipality.

Ontario Fire Marshal requires that each municipal fire department conducts a smoke alarm program, including home fire escape planning and distributes fire safety education materials.

Get Real Durham Program

Get Real Durham Program was established in 2015 through the Public Educators Committee of the Durham Regional Fire Prevention Officers Association. The program provides basic fire safety information for placement of Smoke Alarms, Carbon Monoxide Alarms and Home Escape Planning.

Through direct mail to 2000 residences within selected communities in each municipality along with postings on social media, Facebook, Twitter and Municipal website, consistent messaging was provided throughout the Region during the months of April and September.

The Process of Fire Prevention Inspection Duties

The Fire Prevention Division inspects properties as per the following requirements:

- Regularly scheduled inspections of properties.
- Regularly scheduled inspection of “At Risk” properties.
- Complaint request.
- As a follow up to a Fire Department response to a location.
- Changes to property occupancy, ownership and/or designation.
- Required inspections of “Vulnerable Occupancy” properties.
- Request by an owner, operator, tenant and/or an outside entity.

The inspection of a property consists of eight (8) steps

- Contact the owner/tenant.
- File search for previous inspections and/or fire code violations.
- Review applicable fire safety plan.
- Inspection of the specific building.
- Note-taking of all findings.
- Research/review of any contraventions.
- Creating inspection orders, when necessary.
- Subsequent re-inspections.

At Risk/Vulnerable Occupancy Properties

As per the requirements of The Office of the Fire Marshal and Emergency Management regular inspections are required of properties that involve:

- Large combustible/chemical/hazardous storage capacities.
- Major employer in the municipality.
- Large occupant load.

In addition, the Ontario Fire Code requires annual inspections and annual fire drills to be observed by the Fire Prevention Division at all “Vulnerable Occupancy” properties, specifically:

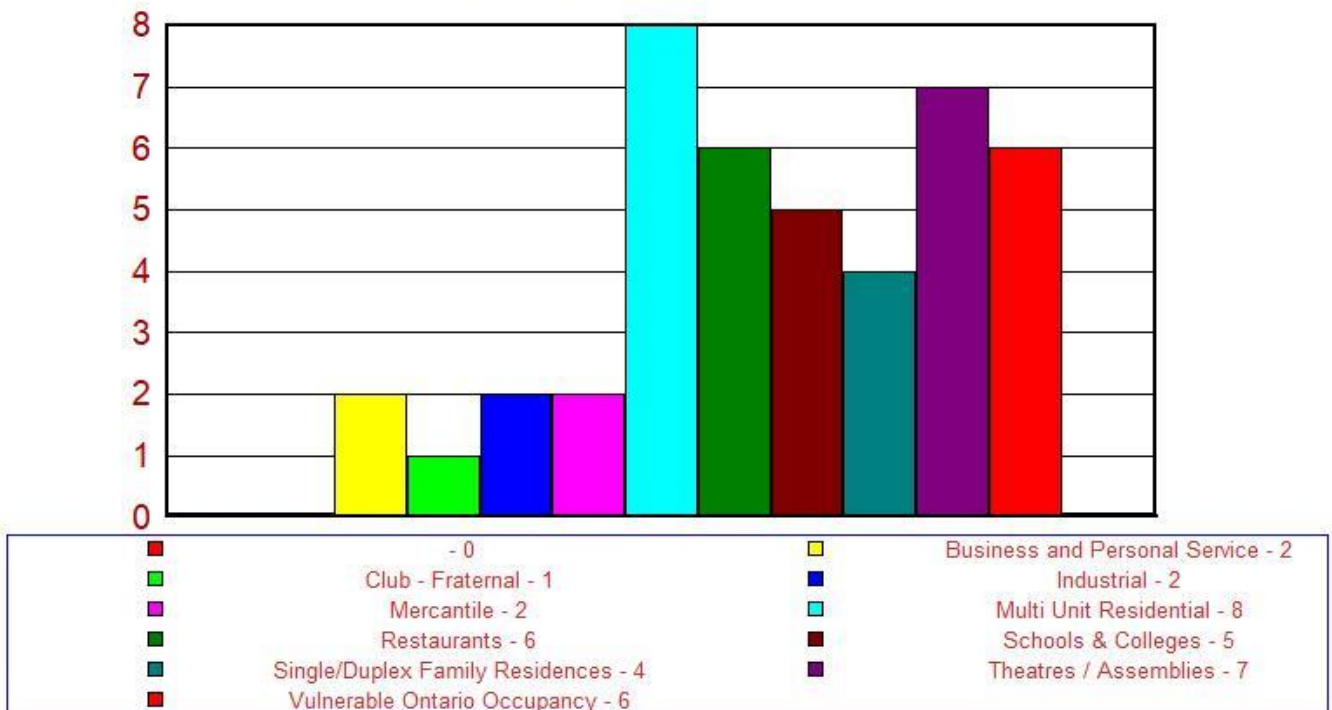

- Care Facilities.
- Care and Treatment Facilities.
- Retirement Homes.

In 2021 five (5) “Vulnerable Occupancies” within Brock Township completed all requirements.

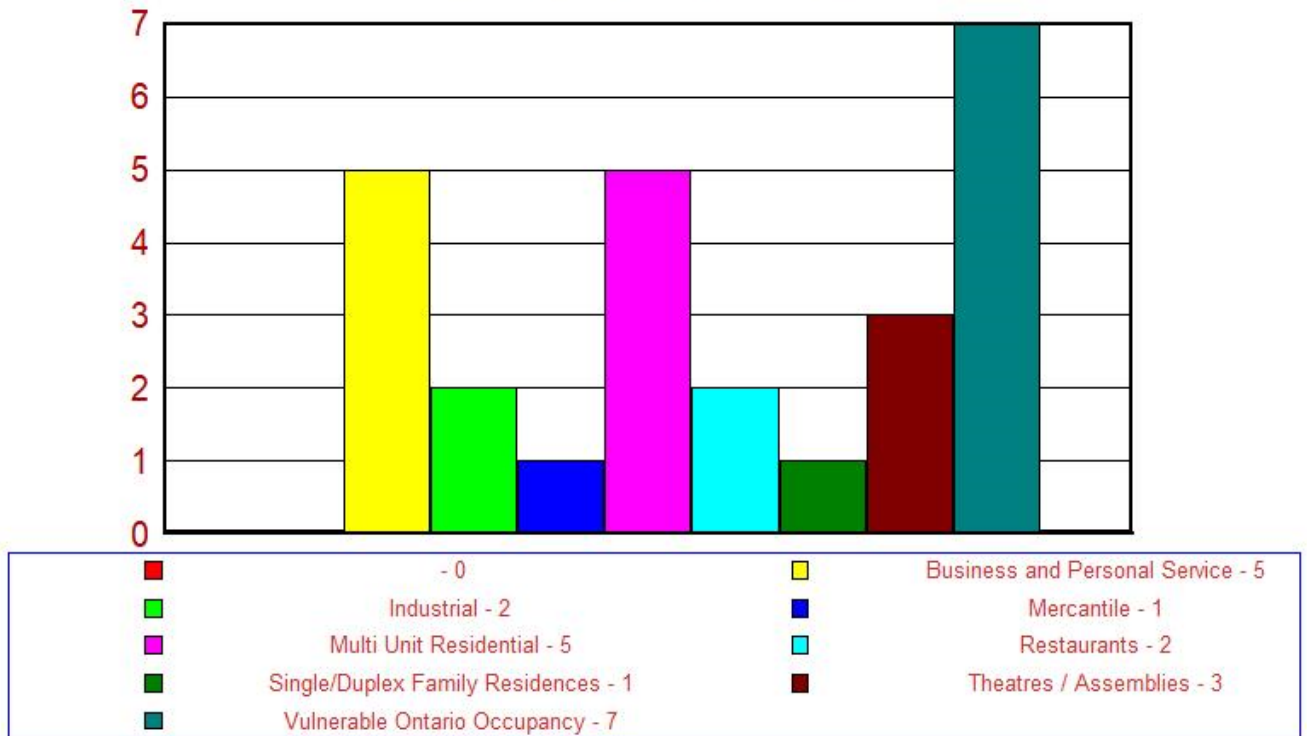

The following statistical graph illustrates the inspection totals as per the Building Code Classification.

Totals by Bld. Code Class From Jan 1 17 to Dec 31 17

Totals by Bld. Code Class From Jan 1 18 to Dec 31 18

Ontario Fire Marshal Standard Incident Reporting - Response Type

Suppression personnel respond to a variety of calls, the calls are reported to Council on a quarterly basis, under the following Response Type headings:

FIRES AND EXPLOSIONS:

Incidents of destructive and uncontrolled burning involving structures, vehicles and open area fires, including explosion of combustible solids, liquids or gases which may or may not have resulted in a dollar loss.

PRE-FIRE CONDITIONS:

Incidents with no fire that involve heat or potential pre fire conditions e.g. pot on stove, cooking – smoke or steam, lightning, fireworks.

BURNING (CONTROLLED):

Complaint call related to outdoor controlled burning, authorized or unauthorized.

FALSE FIRE CALLS:

Alarm activation or fire call that when investigated, is determined to be as a result of equipment failure, malicious/prank, perceived emergency, accidental activation of alarm by person.

CO (CARBON MONOXIDE) FALSE ALARM:

A call where it is determined that the detection equipment malfunctioned or there was a perceived emergency – no CO leak.

PUBLIC HAZARD CALLS:

Includes a response for spills and leaks of a hazardous product such as Natural Gas, Propane, Refrigerant, Miscellaneous/Unknown, Gasoline or Fuel, Toxic Chemical, Radio-Active Material, Power Lines Down.

RESCUE CALLS:

A call for a person in danger due to their proximity to the occurrence and who is unable to self-evacuate and is assisted by Fire Department personnel i.e. Vehicle Accident, Building Collapse, Commercial/Industrial Accident, Home/Residential Accident, Person's Trapped in Elevator, Water Rescue or Water/Ice Rescue.

MEDICAL CALL:

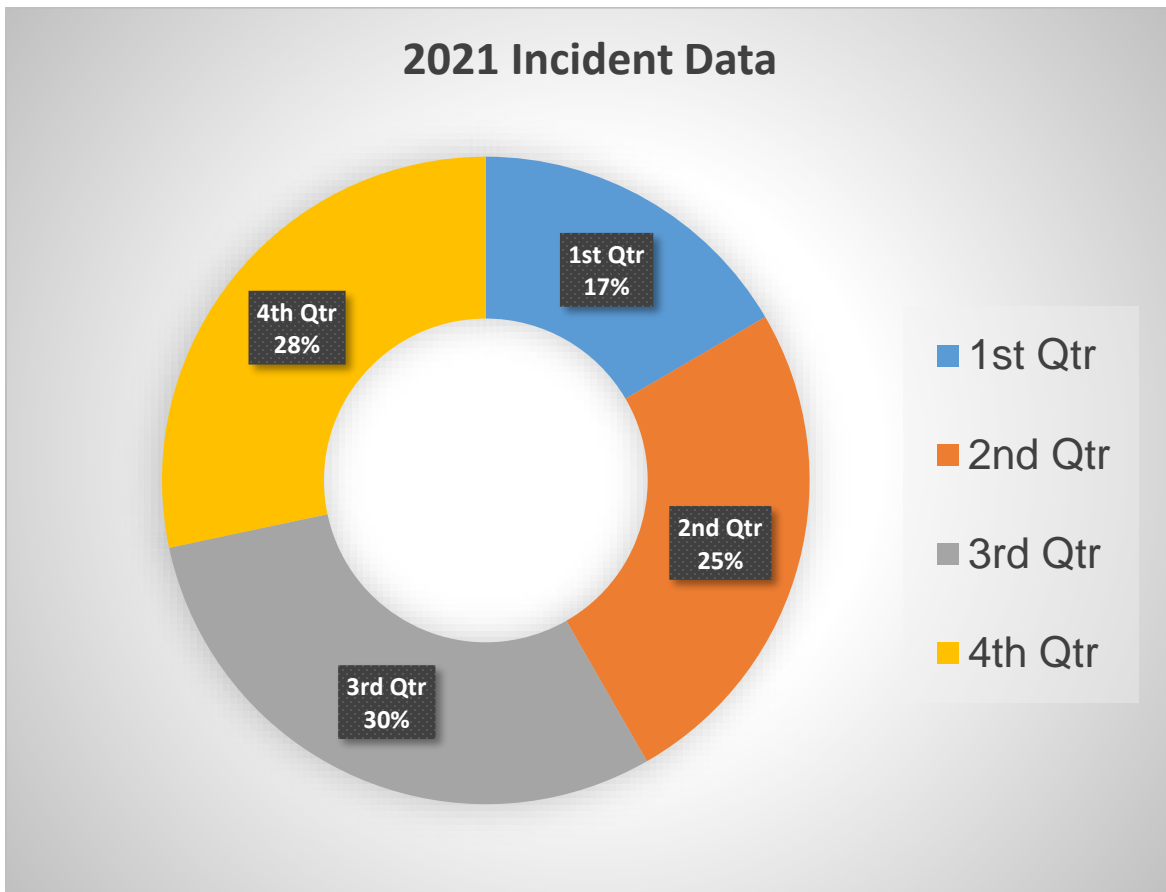

Includes a response to assist and/or administered CPR, Defibrillation.

OTHER RESPONSES:

Assistance to other Fire Departments, call cancelled on route, non-fire incidents where an illegal grow operation or drug operation was discovered.

Duty Calls-----Serving the Public

Training and Professional Development

Annual training ensures that firefighters and officers operate effectively and as safely as possible. The women and men of Brock Township Fire Department participate in approximately 100 hours of training, annually, to ensure their readiness to serve the public when called upon.

Developing fire department personnel to fire service standards, best practice, Occupational Health & Safety Regulations, and the expectations of Council requires a great amount of dedication and commitment.

Training consist of:

- Auto Extrication Skills
- Driver Obstacle Course
- Emergency Medical Responder Training
- Fire Fighting Skills
- Pumper Operations
- Rapid Intervention
- Radio Communications
- Water/Ice Rescue
- Ropes & Knots
- Firefighter Survival
- Search & Rescue
- Fire Attack
- Ventilation
- Command
- Accountability & Entry Control

Ice/Water Rescue Training on Lake Simcoe, right equipment, training, attitude and dedication make a difference.
