| Total | 56,700.00 | | | | |

Township of Brock Budget 2025 Staffing Business Case Explanation

| Department: | Parks, Recreation and Facilities |
|---------------------|----------------------------------|
| Project Name: | Temporary Facility Coordinator |
| Submitted By: | Wayne Ward |
| Project Start Year: | July 2025 |
| Funding: | Rate Stabilization |

Project Description/Justification

To ensure continued operation, support and asset management of all Township buildings, the reintroduction of a facility coordinator to work with the Director of Parks, Recreation and Facilities should provide for ongoing capital and operational success. This will be a temporary position for 2025, funded by Tax Rate Stabilization and scheduled to commence in July.

The facility coordinator will be responsible for administrative and supervisory duties for the planning, coordination and completion of capital and operating functions for all Township properties including halls, arenas, garages, libraries and fire stations.

Transferring all Township properties to the Parks, Recreation and Facilities department will allow for better planning of annual, quarterly, monthly, weekly and daily maintenance and scheduling of contractors.

This position will also assume the role and responsibilities of Harbour Master and will be responsible for the annual berthing slip agreements, coordination of the installation and removal of the Beaverton Harbour berthing slips, maintenance of Thorah Island Harbour as well as the boat launches.

This position will report directly to the Director Parks, Recreation and Facilities and will be involved in the preparation of the annual operating and capital budgets as well as preparing procurement documents for approved projects and will oversee these projects for all facilities.

This position will also investigate opportunities for grants and funding opportunities and will bring forward to the Director for direction. Involvement in the grant writing and funding applications will be in conjunction with the Director.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|---------------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | <u>\$48,400</u> | <u>\$110,804</u> | | | | |
| Identified Funding Source | Tax Rate Stabilization | <u>Unknown</u> | | | | |
| | | | | | | |
| Expected Annual Operating Costs | <u>\$NIL</u> | <u>\$110,804</u> | | | | |

It is unsure at present time if this position will be an ongoing requirement, however, will be beneficial to the Township as the Department deals with a number of ongoing projects, including the Sunderland Arena Expansion and the potential Beaverton Arena projects.

Expected Benefits and Service Level Impacts:

With the separation of Parks, Recreation and Facilities from Public Works the Director Parks, Recreation and Facilities has been tasked with all responsibilities of the department while also assuming some additional responsibilities that were previously performed by Public Works staff.

With the assumption of all Township buildings including works garages, fire stations and the animal shelter the workload for the Director is becoming difficult to manage.

This will allow the Director to focus on larger projects such as the Sunderland Arena renovation and to prepare short- and long-term forecasting for all facilities as well as department specific fleet and equipment.

With the requirements for Asset Management increasing the Director will be able to provide better information through the knowledge of the facility coordinator.

Improved preventative maintenance and scheduling of service may result in reduced costs for repeated contractor visits and could include multi-discipline contractors being tasked with increased tasks within a facility thus reducing the number of contractors and site visits.

Risk to the Township if Expenditure Not Included in Budget:

Continued reliance on one person to oversee a very large portfolio and more reactive management and maintenance of facilities. Delays in getting projects tendered and awarded due to time restraints.

Township of Brock Budget 2025 Operating Business Case Explanation

Department: By-Law and Animal Services

Expense Type (Highlight which type):□ Staff Request

□ New Service, Project or Initiative

□ Expanded Level of Service

Project/Expense Name: PT By-Law and Animal Services Staff

G/L Account (if available): 10-10-21-240-5580-6010 BL Salaries

Total \$ Increase (Decrease) for 2025: \$900

Proposed Funding Source: Levy

Executive Summary:

The intention of this business case is to propose the removal of 1 of the Full Time Seasonal Officer positions and transfer the salary to PT By-Law and Animal Services enforcement in order to provide for the addition of a PT Officer who would be able to be utilized and scheduled, as required throughout the 7-day work week. This proposal will continue to enhance the service levels within the Department year-round and provide much needed relief and manpower while still retaining one of the extended hour weekend service requirements during the summer months. The created year-round PT position will still provide support to the remaining seasonal position but, will additionally provide support year-round to the regular staff compliment.

Background:

The By-Law and Animal Services Division, including Traffic Control is compromised of the following: FT Supervisor, 1 FT By-Law Officer (SR), 1 FT Animal Control Officer, 2 Pt By-Law/ Animal Services Officers, 1 PT Animal Services/Animal Care Attendant and 2 FT Seasonal By-Law Officers (May-Sept) and 8 School Crossing Guards. All By-Law/Animal.

Officers are cross trained to administer all enforcement duties, including crossing guard duties. Examples of enforcement activities include, but are not limited to public education, traffic control, licensing inspections, property standards, zoning, parks and community patrol, 24-hour emergency response (animal services), fundraising, noise, nuisance, and animal rescue and control.

Staff also assist with the general operation of the Dench Animal Shelter which provides The following services; providing quality care to animals in distress, fostering, impounding and adoptions, collaboration with industry partners and public education and the promotion responsible animal welfare and ownership.

The deployment of staff is provided based on the time of year and the staff compliment that is available. General operation requires that an animal service/animal care officer and a by-law officer are available 7 days a week from 8:30am-430pm.

Commencing November 15th to April 15th of each calendar year, staff are required to work the extended hours, to conduct a few overnight shifts per week for the enforcement of winter parking restrictions, including monitoring and enforcement of permitted lots located within Sunderland and Beaverton. These shifts are scheduled primarily based on preliminary weather forecasting for the coming week prior to, during and immediately following a snow event when the staff compliment is available.

In the summer months, commencing the weekend prior to the Victoria Day Holiday until the weekend after Labour Day, staff are required to work extended hours on weekends, including holiday Monday's where applicable. The extend hours during this time period are conducted by two FT seasonal by-law officers that are hired each year. These positions were added to the staff compliment in the year 2022 in order to combat an increased level of by-law (noise, nuisance, firework) and traffic issues resulting from the post covid boom of short-term rental properties within the Township of Brock.

Description:

Since introducing the seasonal FT By-Law position in 2022, staff have noted through statistical data provided in the Quarterly reports a big drop off in complaints throughout the summer months in the evening hours. The projected increase to the number of short-term rentals located within the Municipality did not occur nor did a sharp increase in tourism or day trips to the area. In 2023 and 2024, the seasonal staff, out of necessity due to vacations, staff illness, paternal leave and the unexpected and unabated increase in animal services investigations the hours to these positions were adjusted and the seasonal staff redeployed, as needed. These staff received training in animal services, rescue and care and were also placed on the emergency on call rotation. These changes to the hours and in deployment provided immediate relief to regular staff, lessened staff burnout, and ensured that service levels remained at a high level in all sectors due to the increased manpower available. These adjusted hours occurred minimally in 2023 but became more permanent in the 2024 season.

It is important to note, that the seasonal staff despite the adjustments, along with the PT by-law and animal services staff still maintained the service levels during the summer, including extended hours as required by Council.

Explanation of Changes (Seasonal By-Law)

In 2022 and 2023, the Seasonal FT By-Law positions were provided 490 hours @ \$21.00 an hour (May – September). In the year 2024, the Township had difficulty precuring staff and had a low application rate. Staff conducted a basic review of the salary provided and it was noted that the entry level and contract hourly rate @ 21.00 an hour was far below the average for similar positions in Ontario. The average entry level hourly rate was between @ 25.00 to 35.00 per hour. As such, a decision was made to introduce the position at an hourly rate of @23.16 per hour. The proposed hourly rate for the 2025 budget would be consistent with 2024 increased rate and be @23.16 per hour (pending any unknown increases).

The recommended change to the staffing levels will have very minimal impact on the budget of \$900.

This new staffing initiative, the proposal essentially changes the name of one of the FT seasonal officers (May-Sept) to an additional Pt By-law and Animal Services Officer (year-round). To fund this change, at almost the full amount, staff propose the amount in the protection services budget 10-21-240-5580-6012 BL-Part Time Enforcement staff (Seasonal) be moved to 10-10-21-240-5580-6010 BL Salaries and the salary amount of 1 of the FT seasonal positions also be utilized toward the new PT Officer. As such the only remaining cost increase to the budget would be a total of \$900. (Please see chart below)

As mentioned within this business case, 1 FT Seasonal position would still be in place and extended hours would still be maintained in the summer months. The change of one of the Seasonal FT positions to a year round PT By-Law and Animal Services will allow for more flexibility for extended hours, staff coverage and staff relief year round as needed and required enhancing the service level delivery.

Expected Benefits and Service Level Impacts: (Please see above)

Alternative Service Delivery Approaches Considered and Explained: N/A

Cost/Benefit Analysis:

| | FTE | Full Year | 2025 | 2026 |
|--------------------------------|--------|-----------|-----------|------|
| | Impact | \$ | \$ | \$ |
| Costs | | | | |
| Salaries and Benefits | | | \$13,542 | |
| Other Operating Costs | | | | |
| Funding Courses (Cost Courings | | | | |
| Funding Sources/Cost Savings | | | | |
| Transfer PT By-law Salary | | | (\$3,200) | |
| STR Transfer | | | (\$9,442) | |
| Net Operating Costs (Savings) | | | \$900 | |

| Capital Requirements | | \$NIL | |
|----------------------|--|-------|--|

Risk to the Township if Expenditure Not Included in Budget:

There is no risk to the Township should this expenditure not be included in the Budget however; the inclusion would help to enhance the service levels in the department year round as opposed to just the summer season.

Departmental Levy Increase \$ for 2025 Departmental Levy Increase % for 2025

Township of Brock Budget 2025 Operating Business Case Explanation

| Department: | Development Services - Building | | | |
|---|--|--|--|--|
| Expense Type (Highlight which type): Staff Request | | | | |
| | □ New Service, Project or Initiative | | | |
| | □ Expanded Level of Service | | | |
| Project/Expense Name: | Building Permit Revenue | | | |
| G/L Account (if available): | 10-20-100-0000-5640 | | | |
| Total \$ Increase (Decrease) for 202 | 5: \$40,000 decrease in anticipated building permit fees | | | |
| Proposed Funding Source: | Levy Impact | | | |

Background:

Building permit fees are dependent on the number of applications received each year, so it is hard to predict. Predicting building permit revenue on an annual basis is based on anticipating a certain number of applications and such revenues are dependent on the overall market and construction levels. The past few years have seen below average numbers of building permits due to high interest rates and increased construction costs.

Rationale:

While it is anticipated that building permit activity may begin to track in a more favourable direction in 2025 based on decreases in interest rates, it is hard to predict. Staff are taking a more conservative/realistic approach based on average permit numbers experienced over the past few years and have also proposed some revisions and increases to the permit fees. This will allow the Township to better plan for building related expenses.

Township of Brock - 2025 Budget CAO and HR- Operating Summary

| Revenue | 2024 \$ | 2025 \$ | Explanation |
|---|---|--|---|
| Rate Stabilization | -58,538 | 0 | |

Township of Brock Budget 2025 Operating Business Case Explanation

| Department: | Clerks Department |
|------------------------------------|--|
| Expense Type (Highlight which type |): Staff Request |
| | New Service, Project or Initiative |
| | Expanded Level of Service |
| Project/Expense Name: | GovStack |
| Total \$ Increase for 2025: | \$22,500 |
| Proposed Funding Source: | IT Reserves – PRE-BUDGET APPROVAL RECEIVED |

Executive Summary: The intention of the business case is to explain the upgrade to our Township website platform.

Background: Earlier in 2024, staff received noticed that the current municipal website platform (iCreate) was reach end of life and would not be supported moving forward.

Description: The Township of Brock has utilized GHD as our website provider since May 2020. Their current platform iCreate has reached end of life status and is no longer being supported. GHD is now utilizing a new platform, Govstack, for its municipal customers' websites.

A report went to Council on August 12, 2024 and received pre-budget approval which authorized staff to remain with GHD and to commence work in a new website, using Govstack.

The estimated budget for this work was \$43,000 and includes a one-time implementation fee of \$22,462.50 as well as an annual fee. This purchase was approved and being funded as \$22,500 from IT reserve and the remaining \$20,500 from IT operating budget

Departmental Levy Increase \$ for 2025 Departmental Levy Increase % for 2025

Township of Brock Budget 2025 Operating Business Case Explanation

| Department: | Council |
|---------------------------------------|--------------------------------------|
| Expense Type (Highlight which type) |):□ Staff Request |
| | □ New Service, Project or Initiative |
| | \Box Expanded Level of Service |
| Project/Expense Name: | Community Improvement Plan Grants |
| G/L Account (if available): | 10-60-768-7880-6852 |
| Total \$ Increase (Decrease) for 2025 | 5: \$15,500 |
| Proposed Funding Source: | Tax Levy |

Executive Summary:

A stable funding source is recommended to support the grant programs outlined in the newly adopted Downtown Community Improvement Plan.

Background:

In 2024, Council approved a new Downtown Community Improvement Plan (CIP) to help support improvements and revitalization within the downtown cores. In 2024, a total of \$20,000 was budgeted for the CIP with \$15,000 funded from the committed projects reserve and \$5,000 funded by the tax levy. \$4,500 is currently remaining in the committed projects reserve from the 2024 budget.

Description:

A total of \$25,000 is recommended to be included in the 2025 budget to support community improvements grants. \$5,000 was previously funded through the tax levy and there's approximately \$4,500 remaining in the reserve that can be carried forward from 2024. Therefore, an additional \$15,500 is proposed to be from new tax levy funding to support CIP grants within the 3 downtown areas for a total budget of \$25,000 for 2025.

Expected Benefits and Service Level Impacts:

The Downtown CIP grant programs help to encourage private investment within the downtown areas to renovate, clean-up and develop properties, which helps to attract businesses and create residential units and support jobs and residents within the downtowns to create vibrant spaces. Redevelopment and rehabilitation also help to improve the tax base in the downtowns.

Alternative Service Delivery Approaches Considered and Explained:

In future years, any unused funds for the CIP will be carried forward to the next budget year to support the CIP grant programs.

Cost/Benefit Analysis:

Given the range of revitalization needs identified through the Downtown CIP review, it is important for funding to be made available to support a broad range of financial incentive programs, and at levels that will meaningfully encourage landowners and businesses to invest in the community.

The value of the financial incentive programs is an important consideration. The CIP grant programs must be of sufficient value in order to encourage eligible applicants to invest. As an economic development tool, the financial incentive values also need to be competitive with other CIPs to attract and/or retain local businesses or facilitate desirable development and redevelopment. However, it is also necessary to recognize that the long-term funding of a CIP must be sustainable, and therefore the values need to be realistic and within a municipality's fiscal capacity.

Risk to the Township if Expenditure Not Included in Budget:

Township would not be able to support the Downtown CIP program in 2025 without any tax levy support. There would only be \$4,500 remaining from the 2024 budget which may not offer enough incentive to landowners to make improvements in the downtowns.

Departmental Levy Increase \$ for 2025

-4,587.00

| Department: | Fire Department | | | | | |
|--|--------------------------------------|--|--|--|--|--|
| Expense Type (Highlight which type |):□ Staff Request | | | | | |
| | □ New Service, Project or Initiative | | | | | |
| | Service Level | | | | | |
| Project/Expense Name: Oshav | va Fire Communications | | | | | |
| G/L Account (if available): | 10-17-100-5400-6270 | | | | | |
| Total \$ Increase (Decrease) for 2025: \$ 27,326 | | | | | | |
| Proposed Funding Source: | Levy | | | | | |

Executive Summary: The intention of this business case is to propose obtaining full fire dispatching/communication services from Oshawa Fire Service Communication Centre in the capacity of a certified public safety communicator(s). The full services is proposed to begin July 1, 2025, with the implementation of the new dispatch system.

Background: For several years Oshawa Fire Service Communication Centre have, as per an agreement, maintained the responsibility of alerting Brock Township Fire Department to all emergency and non-emergency incidents. The communication centre receives the incident and via the radio system alerts the firefighters of the incidents through our paging system. Upon confirming the receipt of the incident all communications with the Oshawa Fire Service Communication Centre would cease. It would then be the responsibility of a Brock Township firefighter to conduct all further radio communications via the station radio in contact with the fire crew at the scene of the incident. The firefighter would be responsible for documenting response times, arrival times, return times, etc. and all other information pertaining to the incident relayed from the fire crew(s) at the scene of the incident. When firefighters are paged for a fire department response the first firefighter arriving at the fire station assumes the responsibility of dispatching. It is unknown who the first arriving firefighter will be on each incident.

In the past there have been incidents where there is a limited number of firefighters available for the truck response and to assume the responsibility of dispatching. Therefore, fire crews have abandoned the radio to accommodate the truck personnel, this displays a health & safety concern regarding the communications gap create by not having a dispatcher. It also brings forward a safety concern regarding the possibility of not maintaining required the requirement of legal regarding in

With the introduction of mandatory firefighter certification, all personnel assigned to taking emergency calls and dispatching emergency vehicles must meet certification requirements as per NFPA 1061 Public Safety Communicator Level I & II.

Therefore, under the certification program all fire department personnel require certification as per NFPA 1061 Public Safety Communicator Level I & II by July 2028.

To meet the requirements of NFPA 1061 certification for all personnel would be very time consuming and financial expensive to certify a maximum 90 personnel by July 2028.

This certification requirement is in addition to all other mandatory certification requirements.

Description: Oshawa Fire Service Communications personnel are certified at the time of their hiring process and continue to receive high level training to meet the requirements of NFPA standards as a certified public safety telecommunicator.

Expected Benefits and Service Level Impacts: certified public safety communicators are trained in the skills to answer the most important calls when the public is requesting emergency services. Emergency service responders depend on emergency telecommunications to get detailed information quickly and accurately. It is most important to maintain the continuity of information from the beginning to the end of the emergency incident. Accurate documentation of pertinent information, such as location of the incident, details of the incident, times involving the incident, fire service response times, request for additional resources, etc. must be always maintained. Having certified personnel trained to the skill level required to ensure all documentation is recorded before, during and after a fire department response is crucial in maintaining records management.

Having Oshawa Fire Service Communications Centre take complete control of all communications consisting of pager alerting, communications between trucks and the centre are great step in the right direction to maintain communication continuity for the health & safety of all fire department personnel on the scene of an incident.

Also, full dispatching service through Oshawa would eliminate the need of the first arriving firefighter at the fire station to assume the responsibility of dispatching. This firefighter can now be on a truck responding to the incident.

| G/L Account (if available): | 10-17-100-5400-6450 | | | | | | | |
| Total \$ Increase (Decrease) for 2025: (\$ 39,000) | | | | | | | | |
| Proposed Funding Source: | Levy Savings | | | | | | | |

Executive Summary: The intention of the business case is to explain the decrease in personal protective clothing as per the 2025 operational budget.

Background: Previous years required the purchasing of personal protective clothing for firefighters as their clothing had reached their life expectancy of 10 years of service. 2024 operational budget and receiving grant money permitted the advance purchasing of clothing that was due in 2024 & 2025. Therefore, purchasing of personal protective clothing is not required in 2025.

Description: Personal protective clothing is required for every firefighter and as per NFPA standards is to be replaced every ten (10) years.

Expected Benefits and Service Level Impacts: Budget decrease pertaining to personal protective clothing.

Total \$ Increase (Decrease) for 2025: \$121,568

Proposed Funding Source: Levy and Rate Stabilization

Executive Summary:

With respect to the winter maintenance program, the Parking Lot Winter Maintenance – external equipment account carries a sufficient budget amount to accommodate the contracted services required to inspect, clear, and treat municipal facility parking lots for the winter season.

Specific municipal parking lots are identified at the beginning of each winter season to be serviced by successful contractors. During a winter weather event, internal staff focus their efforts on patrolling, treating, and/or plowing road and sidewalk segments to meet required response times as recommended through the Ontario Minimum Maintenance Standards. The contracted service to maintain municipal parking lots allows for public parking facilities to be cleared and treated in a reasonable timeframe, consistent with roads and sidewalks, to ensure safe and reliable surfaces for all residents and/or facility users.

Background:

Over the past number of years, the Town has experimented with both internal and external services for this program. Most recently, the Town sought out external services to accommodate parking lot snow removal and surface treatment for the 2023/2024 winter season. Upon review of this service in the spring/summer of 2024, staff found the results to be favourable; whereby call volumes to the Public Works office for parking lot related concerns were minimal over the course of the season and positive feedback was received from Emergency Services regarding response times at the Town's three firehalls.

The operation was decidedly returned to external services after an attempt to initiate this program inhouse. This presented several challenges that can be rectified for future trials but were not attainable with the current resources. Additional purchases were approved to upfit

current in-house vehicles to support snow clearing and sand treatment to these facilities. Unfortunately, the vehicles upfitted with this equipment were not built and structured to withstand this service. Vehicles manufactured for the purpose of snow clearing are typically upfitted with an extensively stronger front-end frame to support the constant impact of pushing snow. Specific vehicles within the Public Work's fleet, forecasted for replacement within the next three (3) years, have been budgeted to include plow and salting equipment. At this time, staff will also look to consider options for bulk storage of salt and recruitment options for seasonal labourers to ensure adequate resources to deliver this service in-house.

Description:

The contracted service to support this operation will typically commence on or around November 1st of each calendar year and remain in effect until on or around April 15th the following calendar year. The work for this operation is invoiced and paid out on an as needed basis, whereby the contractor services facilities as needed and bills back the Town with a brief description of the work completed.

Expected Benefits and Service Level Impacts:

If approved, this service will ensure adequate response coverage for the Town's busier public facility parking lots during a winter weather event. The contracted service will allow for snow clearing or surface treatment operations to commence while internal staff are off on a designated rest period or when they are otherwise fully engaged with a winter weather response, servicing roads and sidewalks.

Alternative Service Delivery Approaches Considered and Explained:

The Town has explored completing this service in-house, but the resources have proven to be limited in the current capacity. The plow and salting equipment retrofitted to current vehicles poses a larger risk of out of service time for maintenance to an aging fleet, while also trying to depend on the uncertainty surrounding casual labourer recruitment. Future consideration to return this operation inhouse will depend on the approval of the appropriate replacement vehicles to complete the operation, along with a more reliable plan for casual labourer recruitment.

Cost/Benefit Analysis:

| | FTE | Full Year | 2025 |
|-------------------------------|--------|-----------|-----------|
| | Impact | \$ | \$ |
| Costs | | \$157,768 | \$157,768 |
| Salaries and Benefits | | | |
| Other Operating Costs | | | |
| | | | |
| Funding Sources/Cost Savings | | | |
| | | | |
| Net Operating Costs (Savings) | | \$157,768 | \$157,768 |

The 2024 budget including an expense of \$36,200, therefore, this represents a budget increase of \$121,568. Of this total, approximately \$78,362 is being funded by Rate Stabilization Reserve in 2025.

Risk to the Township if Expenditure Not Included in Budget:

The budget increase proposal is an estimate as winter maintenance needs will vary year by year. The increase presented for 2025 is based on the estimated total annual costs of carrying out this operation by year-end 2024. If this increase is not approved, staff may not have the sufficient funds to needed to carry out this operation for the entire 2024-2025 winter season. This will put more pressure on inhouse staff to service these parking lots in a winter weather event, with a much longer response time as the current priorities for inhouse staff are to focus on roads and sidewalks first. This may increase the Town's risk to slip and fall claims, and/or not the inability to offer a safely accessible parking facility for all recreation facility users.

Overall Impact on Township Levy for 2025

| Department: | Parks, Recreation and Facilities | | | | | |
|---|--------------------------------------|--|--|--|--|--|
| Expense Type (Highlight which type): Staff Request | | | | | | |
| | □ New Service, Project or Initiative | | | | | |
| | X Expanded Level of Service | | | | | |
| Project/Expense Name: | Parks Reserve Increase Contribution | | | | | |
| Total \$ Increase (Decrease) for 2025 | 5: \$150,000 | | | | | |
| Proposed Funding Source: | Rate Stabilization | | | | | |

Executive Summary:

In order to prepare for new parks and expansion of existing parks, additional contributions to the Parks Reserve will provide greater opportunity for parks equipment and structures.

Background:

The current rate of contribution to the Parks Reserve is \$50,000 per year. With aging infrastructure of playground, sports fields, lighting and new initiatives recommended in the Waterfront and Open Space Plan along with the Parks, Recreation and Culture Master Plan, the current rate of funding is insufficient. Expansion of existing parks such as the MacLeod Park draft plan suggests more items to be included in the park which have not been costed out or planned for.

The 2025 Budget includes contributions from Rate Stabilization to Parks Reserves as follows:

- \$50,000 to general Parks Reserve
- \$50,000 to a reserve for McLeod Park
- \$50,000 to a reserve for Beaverton Harbour Open Spaces

Expected Benefits and Service Level Impacts:

Improved funding for parks and recreation will provide long term impacts by creating new and improved parks and recreation facilities.

Cost/Benefit Analysis:

| | FTE | Full Year | 2025 | 2026 |
|-------------------------------|--------|-----------|-----------|-----------|
| | Impact | \$ | \$ | \$ |
| Costs | | | \$150,000 | \$150,000 |
| Salaries and Benefits | | | | |
| Other Operating Costs | | | | |
| Funding Sources/Cost Savings | | | \$150,000 | |
| Net Operating Costs (Savings) | | | \$NIL | |
| Capital Requirements | | | | |

The contribution increase for 2025 is proposed to be funded from Rate Stabilization. The entire increased contribution for 2025 is \$150,000

Risk to the Township if Expenditure Not Included in Budget:

Should this not be included in the budget the capital improvements in the parks will need to be scaled back with prioritization to projects being a necessary step.

Older play structures may need to be removed without replacement due to insurance requirements or condition of equipment due to safety concerns.

| Department: | Parks, Recreation and Facilities |
|---------------------------------------|--------------------------------------|
| Expense Type (Highlight which type) |):□ Staff Request |
| | X New Service, Project or Initiative |
| | □ Expanded Level of Service |
| Project/Expense Name: | Compressor Overhauls (FHMCC) |
| G/L Account (if available): | 10-40-660-7200-6570 |
| Total \$ Increase (Decrease) for 2025 | 5: \$20,000 |
| Proposed Funding Source: | Beaverton Arena Reserve |

Executive Summary:

In order to ensure continued service without replacement of the compressors it is recommended to conduct overhaul work. The compressors at this site have not been completely overhauled in their life span.

Background:

The two compressors at the Foster Hewitt Memorial Community Centre are at approximately 18 years old. The average life span for a compressor of this type is 25-30 years.

By performing an overhaul of the compressor the unit will receive a thorough inspection and rebuild of key components. This will allow for a better picture of the condition of the compressor internally and may provide insight of any potential issues that may be hidden currently.

Expected Benefits and Service Level Impacts:

Increased length of service of the compressors at the Foster Hewitt Memorial Community Centre. This would allow for more time to add to arena reserves for the eventual replacement of the compressors in the future.

Alternative Service Delivery Approaches Considered and Explained:

The Township could continue to operate the compressors without this overhaul, however, we are at risk of breakdown which may affect operations. By doing this overhaul, we are able to increase the length of service of the compressors.

Cost/Benefit Analysis:

| | FTE | Full Year | 2025 | 2026 |
|-------------------------------|--------|-----------|------------|------|
| | Impact | \$ | \$ | \$ |
| Costs | | | \$20,000 | |
| Salaries and Benefits | | | | |
| Other Operating Costs | | | | |
| | | | | |
| Funding Sources/Cost Savings | | | (\$20,000) | |
| | | | | |
| Net Operating Costs (Savings) | | | \$nil | |

| Department: | Parks, Recreation and Facilities | | | | | | |
|---------------------------------------|---|--|--|--|--|--|--|
| Expense Type (Highlight which type |):□ Staff Request | | | | | | |
| | □ New Service, Project or Initiative | | | | | | |
| | X Expanded Level of Service | | | | | | |
| Project/Expense Name: | Sunderland Town Hall service agreements | | | | | | |
| G/L Account (if available): | 10- | | | | | | |
| Total \$ Increase (Decrease) for 2028 | 5: \$3,000 | | | | | | |
| Proposed Funding Source: | Levy | | | | | | |

Executive Summary:

Introduction of a new line item to account for elevator inspections, TSSA licensing for the elevator, ESA CSS inspections and similar annual inspections is being recommended for better accounting purposes and for greater transparency.

Background:

The above noted inspections are currently being accounted for in the Repairs line in the G/L. With these items not being a repair, separating into a new account will allow for better tracking of expenditures as this facility continues to age and requires more repair work.

Expected Benefits and Service Level Impacts:

No changes to service levels or benefits are expected though this line item request but additional work may be undertaken within the building under repairs.

Cost/Benefit Analysis:

| | FTE | Full Year | 2025 | 2026 |
|-------------------------------|--------|-----------|---------|---------|
| | Impact | \$ | \$ | \$ |
| Costs | | | \$3,000 | \$3,500 |
| Salaries and Benefits | | | | |
| Other Operating Costs | | | | |
| Funding Sources/Cost Savings | | | | |
| Net Operating Costs (Savings) | | | \$3,000 | \$3,500 |
| Capital Requirements | | | | |

Risk to the Township if Expenditure Not Included in Budget:

With an aging building there is potential for greater repairs. If not included in the budget the repair line could be exhausted earlier in the fiscal year and could result in overage of the budget or potential to postpone necessary repairs until the next year, creating a snowball effect.

Township of Brock Budget 2025 Operating Business Case Explanation

Department:

Public Works

Expense Type (Highlight which type):
Staff Request

□ New Service, Project or Initiative

Expanded Level of Service

Project/Expense Name: Catch B/S – Materials

G/L Account (if available): 10-25-252-5650-6620

Total \$ Increase (Decrease) for 2025: \$3,000.00

Proposed Funding Source: Levy

Executive Summary:

The Public Work's section carries a small inventory of spare catch basin parts such as, grates (lids), and support frames that secure the lid in place in any event where an unplanned repair presents itself. While these structures are quite strong and reliable in nature, they are susceptible to the elements and designed to support local traffic, causing for natural wear and tear overtime, along with unexpected deterioration.

Background:

Over the past number of years, the Township has assumed various development projects, specifically with respect to urban subdivision designs and the local infrastructure that typically comes with an urban centre. Additionally, the Township is currently working through various other development projects and requests, similar in nature, where the Township will assume maintenance in the next five (5) to ten (10) years. Once assumed, these developments will continue to add a variety of infrastructure components to the Township's asset inventory including, but not limited to, catch basins.

In conjunction with the Provincial Asset Management mandates and timelines, an updated inventory of all Township catch basins was completed in 2024. The intent of this update was not only to create an updated inventory list for asset management purposes, but also to identify the number of additional catch basins assumed from the most recent subdivision assumptions, including Fairgate Homes and the Kaitlin Corporation in Sunderland. This practice has allowed Public Works staff to get a clearer understanding of what the expected asset inheritance will be for future developments currently underway.

Description:

This budget increase will allow Public Works staff to inventory a variety of different catch basin lid designs and parts. While most catch basins and storm water management infrastructure components are designed to maintain consistent storm water drainage, the fabrication of this equipment has evolved overtime. Brock Township has a wide variety of catch basin styles located across the entire Township. This budget will allow Public Works staff to inventory replacement parts for all designs, including the influx of new infrastructure associated with the newer developments, to provide a consistent service delivery across the entire Township.

Expected Benefits and Service Level Impacts:

If approved, this will align Public Works staff with a sufficient estimated annual budget for any replacement catch basin lids or other applicable parts. Carrying a small inventory of lids will allow for a quick response time in the event of an unplanned repair. Moreover, this will reduce the need for any temporary closures or road plates, which are sometimes inevitable in the event of a catch basin failure where no available replacement lids are in stock at the Public Works Patrol Yard. In accordance with the Ontario Minimum Maintenance Standards (MMS), there are recommended response times to maintain any failing/damaged road infrastructure. Ensuring an adequate supply of replacement lids and parts at all times will better enable staff to meet and/or exceed these response times.

Alternative Service Delivery Approaches Considered and Explained:

The Town may consider forgoing an inventory of spare catch basin parts, however, due diligence to meet or exceed response recommendations through the Ontario MMS is still required. Therefore, the Town would need to seek expedited purchases from various fabricators or seek immediate assistance from contracted services; neither of which would allow for competitive pricing and may even present premium rates to accommodate a quick response time.

| | FTE Impact | Full Year \$ | 2025 \$ | 2026 \$ |
|-------------------------------|---------------|-----------------|------------|------------|
| Costs | | \$5,000.00 | \$5,000.00 | |
| Salaries and Benefits | | | | |
| Other Operating Costs | | | | |
| | | | | |
| Funding Sources/Cost Savings | | | | |
| | | | | |
| | | | | |
| Net Operating Costs (Savings) | | \$5,000.00 | \$5,000.00 | |

Cost/Benefit Analysis:

In 2024, the budget for catch basin materials was \$2,000, therefore, this is an increase to the budget of \$3,000.

Risk to the Township if Expenditure Not Included in Budget:

The budget increase proposal is an estimate as catch basin replacements will vary year by year. The increase presented for 2025 is based on the previous assumption of newer urban residential developments and anticipation of more to come over the next few years. While the Township does currently carry a budget to accommodate an inventory of parts, this increase is specifically in response to new development assumptions and the new catch basin designs that have been presented. The design of catch basin lids and frames, similar to various other portions of local infrastructure, have evolved and enhanced over time. This in turn has forced municipal works departments across the Region to consider their inventory of parts and stock all replacement equipment, old and new, to accommodate maintenance requests to any catch basin lid across the Township. Should the Township choose to forgo this increase, Public Works staff run the risk of not being able to respond with in stock replacement lids to inquiries as they arise and ultimately hinder the chance of maintaining response times through the Ontario MMS. Additionally, an increased reliance on contracted service or fabrication companies with premium rates for expedited requests may be the only outcome to meet response times in a timely manner.

Township of Brock Budget 2025 Operating Business Case Explanation

Department:

Public Works

Expense Type (Highlight which type):
Staff Request

□ New Service, Project or Initiative

Expanded Level of Service

Project/Expense Name: Dust Layer – Materials

G/L Account (if available): 10-25-256-5770-6620

Total \$ Increase (Decrease) for 2025: \$30,000

Proposed Funding Source: Levy

Executive Summary:

With respect to the gravel road maintenance program, the Dust Layer – Materials account is meant to carry a budget amount sufficient to accommodate an annual spring dust suppressant application, along with availability to include additional applications on an as needed basis throughout the course of the summer season.

Background:

Over the past few of years, the Township, along with the rest of Ontario, has experienced milder winter weather, including low precipitation events and an inconsistent freeze/thaw cycle amongst the entire gravel road network. It is anticipated this trend is forecasted to continue through the 2024/2025 winter season. A normal winter weather season, including various precipitation events with a substantial period of ground surface freezing, is very important for gravel roads when it comes to dust mitigation in the spring and summer months. Compacted snow, partnered with below freezing road temperatures, encourage water absorption on gravel roads, assisting with the dust control measures throughout the summer season. This natural absorption practice, coupled with a spring dust suppressant application, is typically a very adequate operation to ensure dust control through the entire spring, summer, and fall seasons. However, the effectiveness of this dust control operation is threatened in the event of warmer, low precipitation winters.

Description:

Due to the milder winter temperatures over the past few years, the three (3)-year trend is showing an increased spend in applications required to seal and control airborne dust throughout the Township's gravel roads, as well as factoring in the standard rate of inflation.

Additionally, Public Works staff is recommending an increase to accommodate a second and third application throughout the summer and fall months to curb the dust in various dry locations with higher traffic volumes.

Expected Benefits and Service Level Impacts:

If approved, this service will ensure an adequate response required to keep the dust from gravel road surfaces under control. This will provide a safer route of travel for local traffic and reduce the amount of airborne dust that tends to have a negative affect on residents and cattle along specific rural road locations.

Alternative Service Delivery Approaches Considered and Explained:

In recent years, Public Works staff have used in house equipment to grade and apply water when necessary after the spring dust suppressant application is complete. While grading and watering is a regular operation to ensure positive drainage for the roadway and adjacent ditches, it is merely a band aid solution to curb dust control. A watering application is only able to absorb into the road surface for a short period of time before the dust starts to kick back up again. Moreover, when multiple water applications are scheduled in a row, and then followed by rain, the gravel road surface is more susceptible to becoming very soft with an increased risk of washouts. The dust suppressant used in these operations is designed in such a way that does not drench the road surface, but rather applied lightly with a combination of water and a calcium treatment designed to soak into the gravel and suppress dust for a longer period than what water alone is able to.

| | FTE | Full Year | 2025 | 2026 |
|-------------------------------|--------|-----------|-----------|------|
| | Impact | \$ | \$ | \$ |
| Costs | | \$255,000 | \$255,000 | |
| Salaries and Benefits | | | | |
| Other Operating Costs | | | | |
| Funding Sources/Cost Savings | | | | |
| Net Operating Costs (Savings) | | \$255,000 | \$255,000 | |
| Capital Requirements | | | | |

Cost/Benefit Analysis:

Risk to the Township if Expenditure Not Included in Budget:

The budget increase proposal is an estimate, based on an three (3)-year increase, as additional dust suppressant applications will vary year to year after the annual application in the spring months. As discussed herein, milder winters experienced over the past few years have proven to leave the township with dryer road surfaces in the summer and fall months. Should the

Township choose to forgo this increase, Public Works staff will continue to have difficulty controlling the dust levels and will need to overspend or seek short term solutions to mitigate the airborne dust levels. As stated earlier, alternative solutions are only short-term options and may pose risk for increased washouts and unstable gravel road surface. This increase will provide staff with the option to apply second and third dust suppressant applications as needed throughout the remaining spring, summer, and fall months.

| Staffing Request | | | | | | | | | | | | |
|---|---|------------------------|----------------------|-------------------|------------------|------|------|--|--|--|--|--|
| Position Title: | Summer Student | | | | | | | | | | | |
| Department: | Public Works | | | | | | | | | | | |
| Position Type: e.g. full-time/contract, union/non-union | Summer contract, non-union | | | | | | | | | | | |
| Job Description: | Provide administrative support and minor site inspections for the Capital Projects Coordinator (CET) within Public Works. Given the time of year (May to September), the Capital Projects Coordinator will be tied up with tendering, awarding projects, regular site inspections and meetings, etc. for all capital projects associated with roads, parks, facilities, and some development projects. The summer student will be able to assist with annual site insepctions and minor condition assessments as it pertains to storm water infrastructure, sign reflectivity, streetlight LED conversion locations, etc. This position will also assist with monitoring bridges and culverts, identified in the 2025 Structures study, and assist the Capital Projects Coordinator with scheduling and collecting data for the tendering purposes. In the event of inclement weather, the summer student will help out tremendously with digitizing tracking records for all of Public Works. | | | | | | | | | | | |
| Rationale: | The Public Works team is looking to evolve the Capital Projects portfolio with better asset condition monitoring, tracking, and project management. Moreover, the ongoing ehancements with the asset management strategy will require constant editing and data management work to maintain consistent records to support future capital replacement forecasts. It is fairly common for municipalities to draw interest from College and University students for summer employment, in this case, specifically those students enrolled in Civil Engineering diploma or degree programs, and/or asset management dipolma programs. | | | | | | | | | | | |

| Project/Expense Name: | Financial Software Replacement | | | | | | |
| Total \$ Increase for 2025: | \$75,000 | | | | | | |
| Proposed Funding Source: | Rate Stabilization Reserve | | | | | | |

Executive Summary: In late September 2024, the Township received word that Microsoft Dynamics announced that they will be ending product support and Updates for Dynamics GP (the Township's Financial Software) on September 30, 2029.

Background: The Township of Brock, like many other municipalities, has been using Microsoft Dynamics Great Plains for many years now and this product is no longer going to be supported in the future by Microsoft.

Several area Treasurers, along with Treasurers in a host of other Ontario municipalities have begun discussions on how to move forward for software transition in the coming years leading up to 2029, however, no decisions have been made yet.

Microsoft is promoting a new product called Microsoft Dynamics 365 Business Central (a cloud based, ERP system), however, staff have not had the opportunity to yet view the software or work on viewing other potential software systems.

Next Steps: It is recommended that throughout 2025, staff commence work to investigate opportunities which might be available in the marketplace and work with other neighbouring municipalities to determine whether economies of scale exist for implementation and purchasing.

In the meantime, staff recommend that the Township begin setting funds aside to support the transition, purchasing and implementation costs and recommend \$75,000 be transferred to reserve for 2025 and that staff report back to Council later in 2025 on estimated next steps and proposed costing, leading in to the 2026 budget.

Township of Brock Budget 2025 Capital Business Case Explanation

Department: Public Works Project Name: Road Rehabilitation/Repair Submitted By: James Peitos

Project Start Year: 2025

Project Description/Justification

This project involves various locations in the Township. As per the Township's four (4) year Road Rehab program approved in 2023, this project will capture road segments that require repair.

Subject to approval, the 2025 budget seeks to include road rehabilitation and repair along various segments of Concession 1 (T), Concession 2 (T) and concession 3 (T), as per locations identified in our Road Rehab Program. By repairing and rehabilitating these roads they will be ready the following year to except the double surface treatment.

Concession 1(T) between Highway 2 and Sideroad 18 and a segment of road between Highway 12 and Side Rd Total: \$283,616.75

Concession 2 (T) Between Simcoe St and Thorah Side Rd and a segment of road west of Thorah Side Rd Total: \$262,688.25

Concession 3 (T) east of Side Road 17 to Highway 12 Total: \$281,695.00

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|-------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | 828,000.000 | | | | | |
| Identified | | | | | | |
| Funding Source | | | | | | |
| | | | | | | |

| Expected | N/A | N/A | N/A | N/A | N/A | N/A |
|--------------|-----|-----|-----|-----|-----|-----|
| Annual | | | | | | |
| Operating | | | | | | |
| <u>Costs</u> | | | | | | |

Expected Benefits and Service Level Impacts:

The Road Rehabilitation program is an important operation to ensure municipal road assets remain in good repair. The road rehab program will help bring back roads that are in unsatisfactory condition. This will allow opportunities to further upgrade our roads by using double surface treatment and slurry seal. This will allow safer travel on roads and allow our snowplows to work more efficiently in the winter.

Risk to the Township if Expenditure Not Included in Budget:

Road rehabilitation program is the first step to having the best possible outcome in repairing and upgrading our roads. Choosing to abandon the road rehabilitation program, opens the township to liability with rough and undesirable driving conditions. As well without the road rehab program the success for future double surface and slurry treatment is greatly impacted.

2023 Road Rehab Plan Corporate Asset Management Strategy 2023 Roads Needs Study

Township of Brock Budget 2025 Capital Business Case Explanation

Department: Public Works

Project Name: Gravel Placement

Submitted By: James Peitos

Project Start Year: 2025

Funding: Ontario Communities Infrastructure Fund (OCIF)

Project Description/Justification

This project includes the delivery of gravel material and spreading to various locations, as well as stockpiles for the Beaverton Patrol Yard and the Sunderland Works Yard.

Subject to approval, the 2025 budget seeks to include gravel delivery to various segments of roads identified by staff through site inspections and/or during routine grading operations. Locations will change on an as needed basis and will prioritize evenly across the entire Township. The stockpile option for this project will allow staff the ability to quickly address washout concerns or other areas in need of material on an as needed basis throughout the spring, summer, and fall seasons.

As a result of tried and tested applications of varying gravel materials over the past number of years, the Public Works Department will be taking the opportunity in 2025 to implement gravel options that include a limestone mix. Limestone was tested in the municipality last year on one road (Concession 9 Thorah) and has shown to reduce dust in the summer months. Staff will continue to monitor the application against previous gravel locations to identify where the limestone material may provide more favourable results.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$500,000 | \$375,000 | \$375,000 | \$375,000 | \$375,000 | \$2,000,000 |
| Identified Funding Source | \$500,000 | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

Gravel program is proposed to be entirely funded by OCIF in 2025.

Expected Benefits and Service Level Impacts:

The Gravel Placement program is an important operation to ensure municipal road assets remain in good repair. The surface type for various roadways is decidedly based on what will be the most suitable material for the purpose of the road and/or the traffic capacity the road is meant to withstand. Gravel roadways are typically found throughout the Township's rural residential and farming road network, accommodating a medium speed limit for local and commercial vehicles, as well as heavy machinery. In accordance with the Public Work's inhouse routine grading operation, the gravel treatment will ensure that regular local traffic will have a safe and reliable road network that will look to meet or exceed the expected lifespan.

Risk to the Township if Expenditure Not Included in Budget:

The operation of mixing in fresh gravel to local roads on an annual basis will provide a higher chance of meeting the road's desired life cycle or exceeding it. Choosing to forgo the gravel placement will significantly decrease the integrity of gravel material currently on the road and may pose considerable risk to the road structure. The gravel placement program ensures that Public Work's staff have the resources required to maintain the gravel road network to a sufficient and safe service level for all users. Working fresh gravel into specific challenging areas will allow a structured road to have the surface stability required to withstand the local heavy traffic it sees on a routine basis. When gravel placement is ignored or spread in minimal quantities, the road may be susceptible to several risks including, but not limited to, washouts, base rock surfacing, clumping of different materials, negative compaction, an increase in dust, large tire ruts, etc.

Limestone in particular may generate complaints with respect to limestone fines being caked on to the underside of vehicles and residents may blame the limestone for premature failure on certain components of their vehicles. Limestone is better used when being immediately covered with Hot Mix Asphalt or a Double Surface Treatment. Staff acknowledge that Granular A is a finite commodity, and sources of granular A are harder to find. Even when a new source is found it is increasingly difficult to get the source licenced under the Aggregate Act.

2023 Road Rehab Plan Corporate Asset Management Strategy 2023 Roads Needs Study

Township of Brock Budget 2025 Capital Business Case Explanation

Department: Public Works

Project Name: Slurry Seal

Submitted By: James Peitos

Project Start Year: 2025

Funding Source: OCIF

Project Description/Justification

This project includes a Slurry seal treatment along various roadways in Township. As per the Township's four (4) year Road Rehab program approved in 2023, this project will capture road segments that were returned to gravel in 2024.

Subject to approval, the 2025 budget seeks to slurry seal treatment along various segments of Concession 14 (B), Concession 11 (B) and concession 13(B), as per locations identified in year two (2) of the Road Rehab Program. By placing slurry seal on the double surface treatment on the mention roads above, these road segments will have completed the full rehab program for these locations in 2025

Concession 11(B) West of Highway 2 to Side Road 18 and road segments west of Highway 12 to side road 18

Total: \$40,557.00

Concession 13(B) East of Highway 12 to Side Road 18 Total: \$97,196.00

Concession 14(B) East of Highway 12 to Side Road 18 and a segment of road east of Side Road 18 Total: \$72,247.00

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| Total Expenditure\$ | \$210,000 | \$210,000 | \$210,000 | \$210,000 | | |
| | | | | | | |

| Identified Funding Source | | | | | | |
|--|-----|-----|-----|-----|-----|-----|
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

The slurry seal program is proposed to be funded entirely from OCIF in 2025.

Expected Benefits and Service Level Impacts:

The slurry seal program is an important operation to ensure municipal road assets remain in good repair. The surface type for various roadways is decided based on what will be the most suitable material for the purpose of the road and/or the traffic capacity the road is meant to withstand. Slurry Seal will be used on roads that have been rehabilitated to a double surface treatment. The slurry seal will help preserve the double surface treatment along with providing a new driving surface. This will accommodate a medium to high-speed limit for local and commuter passenger/commercial vehicles. In accordance with the four (4) year Road Rehab Program, the slurry treatment will ensure that regular commuter traffic will have a safe and reliable road network that will look to meet or exceed the expected lifespan.

Risk to the Township if Expenditure Not Included in Budget:

By placing slurry seal on double surfaced roads on an annual basis, the roadway will have a higher chance of meeting the desired life cycle or exceeding it. Choosing to forgo the slurry seal schedule will decrease the integrity of double surface treatment. Selected roads identified through the Road Rehab. Choosing to forgo application at these locations for 2025 will significantly alter staff's ability to maintain positive drainage and adequate grading moving forward, while also increasing the chance for an entire road segment re-build prior to meeting the desired life cycle.

2023 Road Rehab Plan Corporate Asset Management Strategy 2023 Roads Needs Study

Department: Public Works

Project Name: Double Surface Treatment

Submitted By: James Peitos

Project Start Year: 2025

Funding: Development Charges and CCBF (Gas Tax)

Project Description/Justification

This project includes a double surface treatment along various roadways throughout the Township. As per the Township's four (4) year Road Rehab program approved in 2023, this project will capture road segments that were returned to gravel in 2024.

Subject to approval, the 2025 budget seeks to include double surface treatment along various segments of Simcoe St., Concession 14 (B), and Concession 11 (B), as per locations identified in year two (2) of the Road Rehab Program. By returning these road segments to a double surface treatment, they will be ready to receive a slurry seal treatment in 2026, completing the full rehab program for these locations.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$245,000 | \$245,000 | \$245,000 | \$245,000 | \$245,000 | <u>\$1,225,000</u> |
| Identified Funding Source | <u>\$245,000</u> | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

The proposed funding source for DST in 2025 is as follows:

\$24,500 from Development Charges; and

\$225,000 from Canadian Communities Building Fund (Gas Tax)

The Double Surface Treatment program is an important operation to ensure municipal road assets remain in good repair. The surface type for various roadways is decided based on what will be the most suitable material for the purpose of the road and/or the traffic capacity the road is meant to withstand. Double Surface Treated roadways are typically found throughout the Township's rural residential road network, accommodating a medium to high-speed limit for local and commuter passenger/commercial vehicles. In accordance with the four (4) year Road Rehab Program, the double surface treatment will ensure that regular commuter traffic will have a safe and reliable road network that will look to meet or exceed the expected lifespan.

Risk to the Township if Expenditure Not Included in Budget:

By resurfacing segments of double surfaced roads on an annual basis, the roadway will have a higher chance of meeting the desired life cycle or exceeding it. Choosing to forgo the resurfacing schedule will significantly decrease the integrity of gravel material prepared in advance of receiving double surface treatment. Selected roads identified through the Road Rehab Program are returned to gravel for a period of up to one (1) year to allow for natural compaction prior to being returned to a double surface treatment. Failing to meet these timeline recommendations may pose risks for the future success of double surface treatment applications. Choosing to forgo application at these locations for 2025 will significantly alter staff's ability to maintain positive drainage and adequate grading moving forward, while also increasing the chance for an entire road segment re-build prior to meeting the desired life cycle.

Reference Materials That May Assist With/Strengthen Business Case:

2023 Road Rehab Plan Corporate Asset Management Strategy 2023 Roads Needs Study

Department: Public Works

Project Name: HL2 Asphalt Resurfacing

Submitted By: James Peitos

Project Start Year: 2025

Funding: Development Charges and Capital Reserves

Project Description/Justification

This project includes HL2 or HL3 (where applicable) asphalt resurfacing for various roadways in Town. Each year, staff identify sections of roadways in need of resurfacing as per regular condition assessments and in conjunction with the most current Roads Needs Study.

Subject to approval, the 2025 budget seeks to include resurfacing segments of road along Doble St., Pine St., Windor Crt., Laidlaw St. N., and North St. Segments of road have been determined as those areas most in need of repair, however locations may vary on an as needed basis should any segments worsen quicker than others over the course of the winter season.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$200,000 | \$200,000 | \$200,000 | \$200,000 | \$200,000 | \$1,000,000 |
| Identified Funding Source | \$200,000 | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

The HL2 Program is proposed to be funded in 2025 as follows:

\$20,000 from Development Charges; and

\$180,000 from Public Works Capital Reserve

The Asphalt Resurfacing program is an important operation to ensure municipal road assets remain in good repair. The surface type for various roadways is decided based on what will be the most suitable material for the purpose of the road and/or the traffic capacity the road is meant to withstand. HL2 and HL3 surfaces are typically found within Town on local/residential roads, accommodating a low-speed limit and mainly local passenger vehicles. Following an annual resurfacing plan will ensure that in-town residents have a safe and reliable road network that will look to meet or exceed the expected lifespan.

Risk to the Township if Expenditure Not Included in Budget:

By resurfacing segments of asphalt roads on an annual basis, the roadway will have a higher chance of meeting the desired life cycle or exceeding it. Choosing to forgo the resurfacing schedule may increase the chance of the base layer or infrastructure failing sooner than expected. Overtime asphalt surfaces will develop pressure cracks, allowing for water retention that may not encourage the water to drain in accordance with the engineered design. Routine resurfacing encourages positive drainage and protects local infrastructure and base layers. The out of service time for infrastructure repairs or full road repairs along an asphalt surface come with lengthy service disruptions, which is not favourable to the residents these roads typically serve.

Reference Materials That May Assist With/Strengthen Business Case:

Corporate Asset Management Strategy 2023 Roads Needs Study

Department: Public Works

Project Name: Sidewalk Installations and Repairs

Submitted By: James Peitos

Project Start Year: 2025

Funding: Development Charges and Public Works Capital Reserve

Project Description/Justification

This sidewalk master plan was created in 2018 through in consultation with the Brock Accessibility Advisory Committee (BAAC). The proposal was to limit the liability of sidewalks not maintained in the winter. Staff are currently proposing a monolithic sidewalk design in areas deemed necessary to avoid relocation of existing infrastructure and removal of mature trees. By incorporating a monolithic sidewalk, the Township will avoid seeking additional funds for infrastructure relocation and tree removal.

Subject to approval, based on the sidewalk master plan (2023), the recommendation is to allocate \$31,000.00 for sidewalk replacement and \$265,000.00 for new sidewalk installation. This will allow for approximately 1400 l.f of sidewalk each year.

The proposed location for new sidewalk is as follows: Gibb Street, Cannington from Laidlaw St. S. to St. John St. Davidson Street, Cannington from Laidlaw St. S. to Peace St. (south side) Shedden Street, Cannington from Laidlaw St. S. to Peace St. north side Elliot Street, Cannington from St. John St. to Peace St. Main Street West, Beaverton from Nine Mile Road to Parklawn Blvd. Main Street West, Beaverton from Nine Mile Road to Parklawn Blvd.

Removal Replacement: Munro Street, Cannington from St. John St. to Peace St.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|-----------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure | \$296,000 | | | | | |
| | | | | | | |

| Identified Funding Source | | | | | | |
|--|-----|-----|-----|-----|-----|-----|
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

It is proposed that the sidewalk replacement expenses of approximately \$31,000 will be funded from the Public Works Capital Reserve and the new sidewalk installation of approximately \$265,000 will be funded from Development Charges.

Expected Benefits and Service Level Impacts:

The sidewalk program is an important operation to ensure municipal road adjacent facilities remain safe for pedestrians. The location of the new sidewalks will also benefit pedestrians with disabilities allowing them safe access to travel. As the township grows in population over the coming years, new and replacement sidewalks will be a vital addition to safeguarding local infrastructure and allowing for safe pedestrian use, while also not impeding the natural flow of traffic.

Risk to the Township if Expenditure Not Included in Budget:

By replacing and adding new sidewalks, as per the Sidewalk Master Plan, the Township ensures pedestrians have safe access to navigate through the three (3) main residential communities. Choosing to forgo the sidewalk plan will open potential liability to the town in the form of trip and fall risks on sub-standard side walks. Forgoing new sidewalk installations poses an increased risk for pedestrian safety in the ever-growing communities of Sunderland, Cannington, and Beaverton.

Reference Materials That May Assist With/Strengthen Business Case:

Sidewalk Master Plan 2023 Corporate Asset Management Strategy Brock Accessibility Advisory Committee (BAAC).

Department: Public Works

Project Name: Bridge Need Study - Beaverton Dam Study

Submitted By: Ben Kester, CET, CRs-s

Project Start Year: 2025

Funding: Canadian Communities Building Fund (CCBF)

Project Description/Justification

| Future Forecast for | This Expense | Line (Is it require | d on an ongoing | <u>basis or is it a</u> |
|---------------------|--------------|---------------------|-----------------|-------------------------|
| one-year increase): | | | | |

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-----------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$23,000 | | \$24, 5 00 | | \$25,850 | |
| Identified Funding Source | \$23,000 | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

The proposed funding source for the Bridge Needs Study in 2025 is the Canadian Communities Building Fund (Gas Tax).

Expected Benefits and Service Level Impacts:

The Bridge needs study is a vital contribution to the township as it ensures that bridges and structures remain up to date and safe to the public.

Risk to the Township if Expenditure Not Included in Budget:

Should the Township forgo this study, there will be an increased chance of unforeseen failure to local structures, opening the Township to liability with unsafe infrastructure. Furthermore, the Township will be in breach of the Provincially legislated requirements that require structures to be inspected.

Reference Materials That May Assist With/Strengthen Business Case:

2023 Structure Inspections Summary Report (Chisholm, Fleming and Associates)

Department: Public Works

Project Name: Boundary Road Agreement

Submitted By: Ben Kester

Project Start Year: 2025

Funding: Canadian Communities Building Fund (CCBF)

Project Description/Justification

This project includes the Townships portion of 50% of the cost to cover a double surface treatment along Kydd Rd., which borders Brock and Uxbridge Township. As per the Township's boundary road agreement with the Township of Uxbridge, Uxbridge Public Works staff undertook a road rehabilitation project along Kydd Rd. in 2024. Similar in nature to Brock Township's Road Rehab program, Uxbridge staff have indicated that Kydd Rd. will be ready to receive a double surface treatment in 2025 and 50% of the forecasted budget to complete this treatment has been provided.

In accordance with the Boundary Road Agreement between both Townships, Uxbridge will be responsible for tendering, awarding, and administering this contract, while providing regular scheduling communication as needed to Brock Township staff.

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$103,000 | | | | | \$103,000 |
| Identified Funding Source | \$103,000 | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

The proposed funding source for the Boundary Road Agreement is CCBF for 2025.

The Double Surface Treatment program is an important operation to ensure municipal road assets remain in good repair. The surface type for various roadways is decided based on what will be the most suitable material for the purpose of the road and/or the traffic capacity the road is meant to withstand. Double Surface Treated roadways are typically found throughout the Township's rural residential road network, accommodating a medium to high-speed limit for local and commuter passenger/commercial vehicles. This project has been identified to be hard surfaced through Uxbridge Township's Gravel Road Conversion program and will be solely administered Uxbridge staff. The other benefit is that by hard surfacing the road, less chloride will be released into the environment (no yearly dust control).

Risk to the Township if Expenditure Not Included in Budget:

By resurfacing segments of double surfaced roads on an annual basis, the roadway will have a higher chance of meeting the desired life cycle or exceeding it. Choosing to forgo the resurfacing schedule will significantly decrease the integrity of gravel material prepared in advance of receiving double surface treatment. Kydd Rd. was identified through the Township of Uxbridge's Gravel Road Conversion program that has been on going for at least 15 years. Failing to meet these timeline recommendations may pose risks for the future success of double surface treatment applications. Additionally, choosing to forgo application at this location will make it necessary to add more gravel to the road prior to installing the double surface treatment.

Reference Materials That May Assist With/Strengthen Business Case:

2023 Road Rehab Plan Corporate Asset Management Strategy 2023 Roads Needs Study

Department: Public Works

Project Name: Vehicle Unit #19 – Tandem Axle Snowplow

Submitted By: Dylan Quigley

Project Start Year: 2025

Funding: Public Works Fleet Reserve

Project Description/Justification

This project includes the replacement of snowplow unit #19 within the Public Works Section.

Snowplow unit #19 has exceeded its anticipated life expectancy (15 years) within the Public Works section. It is recommended that this unit be replaced to provide safe and reliable snow clearing services in accordance with the Township's winter maintenance program, as well as readily available for larger roads maintenance projects in the remaining months.

The purpose of the Township's fleet of snowplows is to respond in a timely fashion to winter weather events to clear or reduce snow and ice build-up as per the timelines specified through legislation and the Township's service level agreements. It is recommended that snowplows are replaced at the end of their scheduled life cycle year as to not risk being removed from service for unplanned repairs.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$440,000 | | | | | |
| Identified Funding Source | \$440,000 | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

The Public Works section maintains all municipal owned arterial, collector, residential, and rural roadways within the Township for the purpose of winter snow and ice removal through combined efforts among all Public Works staff. In a normal winter weather response, the Public Works section has dedicated in-house staff to maintain ten (10) routes, utilizing ten (10) inhouse vehicles.

Snowplows sent out for repairs during snow clearing operations are not backfilled with any spares to complete the operation in the most desired timeframe. Unit #19 is a 2013 unit that has been deemed less reliable and more susceptible to unplanned repairs. A replacement snowplow will ensure better reliability, increased efficiency, and minimize the maintenance time and budget required with upkeeping an aging heavy-duty vehicle.

Risk to the Township if Expenditure Not Included in Budget:

Should the Township choose to forgo replacing this vehicle, challenges will significantly increase in staff's ability to keep this snowplow in service. Throughout the entire heavy truck and coach industry, various size fleets are experiencing an increase in frame rail rust separation issues from vehicles manufactured around this time. In accordance with the Ministry of Transportation and the provincial Annual Inspection Certificate program, there is an allowable amount of frame separation before a vehicle is deemed unfit for the road. The frame rail separation on unit #19 is becoming increasingly close to exceeding the allowable measurement. Frame rail replacement is not a recommended solutions as it comes with lengthy wait times and the cost significantly outweighs the current value of the vehicle.

Additionally, procurement for a snowplow is currently up to two (2) years from date of purchase to delivery. It is the recommend that staff begin procurement as soon as possible upon budget approval to ensure a suitable replacement arrives prior to unit #19 being removed from service.

Department: Public Works

Project Name: Vehicle Unit #32 – Crew Cab Dump Body

Submitted By: Dylan Quigley

Project Start Year: 2025

Funding: Public Works Fleet Reserve

Project Description/Justification

This project includes the replacement of unit #32, a medium duty crew cab dump body pickup truck, within the Public Works Section.

Pickup truck unit #32 has exceeded its anticipated life expectancy (7 years) within the Public Works section. It is recommended that this unit be replaced to provide safe and reliable transportation services in support of the Township's service level agreements all year-round.

Additionally, this replacement will include plow and salter attachments to better prepare staff with the resources required to complete all winter maintenance operations inhouse for future years. The purpose of the Township's fleet of winter maintenance equipment is to respond in a timely fashion to winter weather events to clear or reduce snow and ice build-up as per the timelines specified through legislation and the Township's service level agreements.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$115,000 | | | | | |
| Identified Funding Source | \$115,000 | | | | | |
| Expected Annual Operating Costs | N/A | N/A | N/A | N/A | N/A | N/A |

It is recommended that unit #32 be replaced to provide transportation for staff and equipment for the purpose of year-round roads maintenance within the Public Works section. In accordance with recent years' technology advancements, and to comply with a lower emissions fleet where possible, a vehicle of this size and class with medium range annual mileage will be better suited with a gasoline engine. Moreover, this vehicle is recommended to be purchased with a properly manufactured and upfitted frame to support snowplow and drop-in salter equipment. This will allow for Public Works staff to consider reducing the future need for contracted service assistance within the Township's facility parking lots snow clearing program. Returning this service to inhouse staff, provided the appropriate equipment is approved for purchase, will have a cost savings from the contracted service provider currently conducting this service. Moreover, Public Works staff may find that a solely inhouse snow clearing program will provide more accurate data and create for a more manageable operation with consistent response times in accordance with current and future service level agreements.

Risk to the Township if Expenditure Not Included in Budget:

Currently, diesel engines within the medium duty vehicle class can be very timely to repair when it comes to emissions issues. The Provincial government has legislated emission control devices on all diesel engine vehicles from the early 2000's and newer. Unplanned repairs are common for these emission control devices on all class vehicles but can be even more common on vehicles in a lower mileage roll. Commercial diesel engines, along with the emission control devices, are designed for high mileage vehicles or vehicles regularly hauling or towing material and/or equipment. Low mileage diesel vehicles are more prone to experience engine emission issues, which can be quite costly and time consuming to repair. These emission control issues are designed to increase and be harder to diagnose in an aging vehicle of this size and class.

Extending the life cycle of this asset may result in significant service disruptions and an increase cost to keep the vehicle in service.

| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |
| Funding: | Proposed to be Funded from the Community Sport and Recreation Infrastructure Fund (50%) and the Beaverton Arena Reserve (50%) |

Project Description/Justification

One of the two current dehumidifiers in the Foster Hewitt Memorial Community Centre is a 1995 Freon refrigerant dehumidifier. This unit is well past its life span of around 15 years.

Freon refrigerant is a known ozone depleting compound and is regulated. In the event of a failure of the unit the freon could be discharged into the environment. There could also be some health effects if any person is in close proximity to the unit and if in the path of the release. This is highly unlikely due to the location of the unit however Freon is heavier than air and will dissipate to low areas. The dehumidifier is located close to an emergency exit in the arena area and any refrigerant could be easily addressed by opening the door to allow for natural ventilation.

Replacement of this unit will provide improved dehumidification in the ice surface area and will likely reduce load on the other unit and likely reduced run time of the two units.

This is being included as part of the Community Sport and Recreation Infrastructure Fund application.

Should the Township not be approved for Community Sport and Recreation Infrastructure Funding, this project is still required to be moved forward in 2025 and it is proposed to then be entirely funded by the Beaverton Arena Reserve.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> <u>\$</u> | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------------|-------------------|--------------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$60, <mark>0</mark> 00 | | | | | \$60,000 |
| Identified Funding Source | <u>\$60,000</u> | | | | | <u>\$60,000</u> |
| | | | | | | |
| Expected Annual Operating Costs | | | | | | |

The proposed funding source for the Dehumidifier Replacement Project is 50% or approximately \$30,000 from the Community Sport and Recreation Infrastructure Fund and the remaining 50% or \$30,000 from the Beaverton Arena Reserve.

Expected Benefits and Service Level Impacts:

Replacement of the Freon dehumidifier will provide improved dehumidification in the arena ice surface area, improved ice and better safety for the users and environment in the event of a failure of the refrigeration system of the dehumidifier.

Reduced run time and load on the electric desiccant dehumidifier at the north end of the arena is possible.

Risk to the Township if Expenditure Not Included in Budget:

Potential for failure of the unit could result in release of ozone depleting compounds into the environment. Decreased dehumidification in the ice surface area near the warm lobby area thus creating increased condensation and could result in slippery areas on walkways and bleachers.

Increased reliance on one dehumidifier to cover a greater area possibly reducing its useful life span.

| Department: | Parks, Recreation and Facilities |
|---------------------|--|
| Project Name: | Seasonal Ice Control Unit Replacement |
| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |
| Funding: | Proposed to be Funded from the Community Sport and Recreation Infrastructure Fund (50%) and the Beaverton Arena Reserve (50%) |

Project Description/Justification

The existing infrared seasonal ice control unit at the Foster Hewitt Memorial Community Centre is no longer operational.

This unit is an integral component of the refrigeration system as it provides real time ice surface temperature information to the main control system. This unit allows the main controller unit to determine the thresholds for activation of the compressor units for temperature control of the ice pad.

This is being included as part of the Community Sport and Recreation Infrastructure Fund application.

Should the Township not be approved for Community Sport and Recreation Infrastructure Funding, this project is still required to be moved forward in 2025 and it is proposed to then be entirely funded by the Beaverton Arena Reserve.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$60, <mark>0</mark> 00 | | | | | \$60,000 |
| Identified Funding Source | \$60,000 | | | | | |
| Expected Annual Operating Costs | | | | | | |

The proposed funding source for the Seasonal Ice Control Unit Project is 50% or approximately \$30,000 from the Community Sport and Recreation Infrastructure Fund and the remaining 50% or \$30,000 from the Beaverton Arena Reserve.

Expected Benefits and Service Level Impacts:

Improved ice temperature control through automation. Reduced dependency on staff to take temperature readings manually and inconsistency in locations of readings being taken.

Risk to the Township if Expenditure Not Included in Budget:

Reduced optimization of automated control equipment to provide the best possible ice surface.

| Department: | Parks, Recreation and Facilities |
|---------------------|--|
| Project Name: | Beaverton Fairgrounds Picnic Pavilion |
| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |
| Funding: | Development Charges and Donation from Beaverton Lions Club |

Project Description/Justification

The waterfront and open space plan identified a desire to introduce a picnic pavilion into the Beaverton Fairgrounds. This was also identified as a project that the Beaverton Lions Club would like to be involved in as a supporting partner.

This new picnic pavilion would provide a new covered space to be used for picnics, community events, baseball tournaments, etc.

This new structure would be created to be fully accessible with a concrete pad and would be connected to parking areas with an accessible path.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | 100,000 | | | | | 150,000 |
| Identified Funding Source | \$100,000 | | | | | \$100,000 |
| | | | | | | |
| Expected Annual Operating Costs | | | | | | |

The Beaverton Picnic Pavilion is proposed to be funded in 2025 with a draw of \$75,000 from the Development Charges and a donation of \$25,000 from the Beaverton Lions Club.

Expected Benefits and Service Level Impacts:

A new community use structure of this type in the Beaverton Fairgrounds will provide new opportunities for the public and community groups to hold events, be used for shelter from rain or sun and adds to the usability of the fairground area.

Similar to the existing picnic shelters in Cannington and Sunderland which are used by the general public, community groups, sports organizations, service providers and others, this new structure will be able to provide an area for multiple uses.

Risk to the Township if Expenditure Not Included in Budget:

The only risk from this not being included is the potential loss of partial funding by the Beaverton Lions Club.

| Department: | Parks, Recreation and Facilities |
|---------------------|--|
| Project Name: | Beaverton Harbour Washroom Replacement |
| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |
| Funding: | Cash in Lieu of Parkland |

Project Description/Justification

The parks, recreation and culture master plan as well as the waterfront and open space plan a identified the replacement of the current seasonal washrooms located near the Beaverton Harbour as a need from the community.

The current washrooms are only seasonal and are showing signs of construction failure. The block work is separating as the building is located on the top of the hill overlooking the boat launch parking lot. The doors to access the washrooms are not able to easily open or close due to the shifting of the building.

The fixtures in the washrooms are aged and do not meet accessibility requirements. The fixtures are also not very efficient in water conservation and have limited number of water closets. The washrooms are also gender specific and do not have a non-gender option or a family use option.

Introduction of new permanent washrooms would also reduce the need to rent portable toilets to be placed near the splash pad for seasonal use. If made to be year-round serviceable, this would also eliminate the need for portable washrooms for the winter season near the pier for ice fishing or snowmobiling.

The budget of \$100,000 for 2025 would be used to have drawings prepared by an architect and to be provided for request for proposal to gather more accurate pricing for budget preparation for 2026 construction.

These costs are based on a staff report from the Township of Scugog for a similar project at Palmer Park. The proposal from staff did not have heating or cooling incorporated into the washrooms and only had them as seasonal use.

There are options for cold weather heat pumps to be utilized for this building to provide heating during colder weather. This would also be used to maintain the services from

having to be shut down during the winter and would reduce costs for contractors having to attend to perform this function.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|--------------------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | 100,000 | 350,000 | | | | 450,000 |
| Identified Funding Source | Cash in lieu of parkland | TBD | | | | |
| | | | | | | |
| Expected Annual Operating Costs | No changes | TBD | TBD | TBD | TBD | TBD |

Expected Benefits and Service Level Impacts:

This replacement structure will provide a better level of service for the public with more accessible and up to date washroom facilities near the harbour. The current structure has limited accessibility function.

New washrooms will allow for non-gender specific washrooms and will be equipped with more efficient fixtures and lighting providing reduced water and electrical consumption. Proximity sensors for lighting can help manage electricity use and new LED fixtures will ensure a longer life span and can reduce the number of fixtures required. Exterior fixtures can be placed to reduce excessive light "bleed" during nighttime. Low flush fixtures and motion activated to reduce water consumption.

By including children change tables in all washrooms this provides opportunities for better service for families and/or all care givers to provide a safe location for this purpose.

Risk to the Township if Expenditure Not Included in Budget:

Should this not proceed the existing structure will continue to deteriorate in condition. Eventually the doors on this building will not function and the structure may need to be closed for public safety.

Additional costs for rental portable toilets near the splash pad will continue to be an operating budget item.

Parks, Recreation and Culture Master Plan

Township of Scugog Staff Report, PWIS-2022-027

| Department: | Parks, Recreation and Facilities |
|---------------------|--|
| Project Name: | Beaverton Library Furnace Replacements |
| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |

Project Description/Justification

In mid November 2024 one of the ground mounted rooftop heating and cooling units suffered a malfunction of one of the internal components in one of the two units. These units are 2001 model year and many parts are listed as End of Life and are no longer available for replacement or repair purposes.

These two HVAC units provide the heating and cooling for the entire Beaverton Public Library branch.

Pricing provided below is for the cost of a like for like replacement. Staff are investigating alternative options such as air source heat pumps.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one-year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|--------------------------------|-------------------|-------------------|-------------------|-------------------|--------------------------------|
| <u>Total</u> Expenditure\$ | 80,0 <mark>0</mark> 0 | | | | | 80,0 <u>0</u> 0 |
| Identified Funding Source | Building Capital Reserve | | | | | Building Capital Reserve |
| Expected Annual Operating Costs | | | | | | |

Replacement units will likely be more energy efficient than those of 24 years ago. This would likely result in lower operating costs as well as a reduction in GHG's.

Risk to the Township if Expenditure Not Included in Budget:

The one unit is currently working with parts not built for this unit to keep it operating until budget approval and a replacement unit can be ordered and installed.

Replacement of the second unit, which is the same model year as the first one, will reduce the likelihood of failure.

Reference Materials That May Assist With/Strengthen Business Case:

Department:Parks, Recreation and FacilitiesProject Name:Defibrillator ReplacementsSubmitted By:Wayne WardProject Start Year:2025

Project Description/Justification

The current defibrillators are at end of life and are no longer supported for upgrades and are becoming very difficult to obtain replacement pads and batteries.

To provide the same level of service as we currently are it is recommended that the defibrillators at the three arenas, Beaverton Town Hall and municipal administration building be replaced.

The proposed replacements will be the same manufacturer as the units deployed by Brock Township Fire Services as well as the Region of Durham Paramedic Services.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|--------------------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | 13,700 | | | | | 13,700 |
| Identified Funding Source | Building Capital Reserve | | | | | |
| Expected Annual Operating Costs | | 500 | 500 | 500 | 500 | 2,000 |

Should the public access defibrillator at any of these sites be deployed the pads may be compatible with the professional rescuer defibrillators and may reduce the time between transferring from lay-rescuer to professional rescuer. This typically has a better patient outcome.

No change to current level of service is anticipated.

Risk to the Township if Expenditure Not Included in Budget:

As the current defibrillators come to end of life this reduces the level of service within the specified buildings and may result in a reduced positive outcome in the event of a defibrillator being used on anyone requiring this type of assistance.

Reference Materials That May Assist With/Strengthen Business Case:

<u>N/A</u>

| Department: | Parks, Recreation and Facilities |
|---------------------|----------------------------------|
| Project Name: | LED Lighting Replacements |
| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |

Project Description/Justification

It has been determined through facility inspections while preparing information for Asset Management that many Township facilities are equipped with fluorescent lighting units.

The Canadian government has started a phase out of fluorescent lighting with the ban on manufacturing and importation as of December 31, 2025, an exemption period for replacements until December 31, 2027 and a complete sales prohibition by 2029.

To ensure all facilities are changed over to LED lighting prior to these restrictions and bans coming into effect a tiered approach to lighting replacements is recommended.

The replacement of existing lighting to LED also reduces the energy consumption of the building, can be tailored to the needs of the facility to provide the correct brightness and color tones to ensure adequate lighting for the use and atmosphere of the facility and its uses. It has also been noted during the installation of LED lighting in the municipal administration building along with the Beaverton and Cannington library branches, that a reduction in light fixtures may be able to be made as the newer LED lights provide greater light output.

It is proposed that two facilities be completed in 2025 and increase the number of buildings to between five and eight buildings per year until completion in 2029. Any buildings that may be renovated or replaced during this time frame would be excluded from this list.

The recommended facilities for 2025 are the Manilla Community Hall and the Dench Animal Shelter.

Buildings that have not yet been retrofitted or built with LED are:

- Beaverton Town Hall
- Cannington Town Hall, second floor

- Sunderland Town Hall
- Manilla Community Hall
- Wilfrid Community Hall
- Sunderland Historical Society
- Sunderland Garage
- Cannington Garage
- Beaverton Garage
- Beaverton Patrol Yard, original building
- Beaverton Medical Centre
- Sunderland Medical Centre
- Foster Hewitt Memorial Community Centre
- Rick MacLeish Memorial Community Centre
- Sunderland Memorial Arena
- Beaverton Fire Station, except apparatus floor area
- Cannington Fire Station
- Sunderland Fire Station
- Dench Animal Shelter
- Cannington Lawn Bowling Club
- Beaverton baseball diamond and harbour public washrooms
- Cannington MacLeod Park public washrooms
- Sunderland fairgrounds concession booths and horse barn

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one-year increase):

| | <u>2025</u> | <u>2026</u> | <u>2027</u> | <u>2028</u> | <u>2029</u> | <u>Total</u> |
|--|-------------|-------------------|-------------|-------------|-------------|--------------|
| | \$ | \$ | \$ | \$ | \$ | \$ |
| <u>Total</u> Expenditure\$ | 35,000 | 100,000 | 100,000 | 100,000 | 150,000 | 485,000 |
| Identified | Building | Building Building | | Building | Building | Building |
| Funding | Capital | Capital Capital | | Capital | Capital | Capital |
| Source | Reserve | Reserve Reserve | | Reserve | Reserve | Reserve |
| Expected Annual Operating Costs | | | | | | |

Energy consumption should be observed at each location as lighting is retrofitted. Reduced purchasing of replacement bulbs, ballasts and lenses should also be realized. There should also be a reduction in service calls for electricians as the LED lights typically have a greater life span than conventional lighting.

Lighting that is more adaptable to the location that it is being installed in may reduce glare and light sensitivity.

Risk to the Township if Expenditure Not Included in Budget:

With the pending bans on fluorescent lighting products and components should the Township not phase in retrofitting of new lighting products there will be a point in time where buildings will not be able to operate due to lack of lighting fixtures.

Reference Materials That May Assist With/Strengthen Business Case:

N/A

| Department: | Parks, Recreation and Facilities |
|---------------------|--|
| Project Name: | Manilla Hall entrance ramp and stair replacement |
| Submitted By: | Wayne Ward |
| Project Start Year: | 2025 |
| Funding: | Manilla Hall Reserves |

Project Description/Justification

The existing ramp and stairs at Manilla Hall are wooden and have been receiving repairs over the past couple of years. Replacement with concrete steps and ramp will provide a longer lasting surface thus reducing the repairs necessary to maintain the ramp and stairs.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| <u>Total</u> Expenditure\$ | \$20,000 | | | | | \$20,000 |
| Identified Funding Source | \$20,000 | | | | | |
| | | | | | | |
| Expected Annual Operating Costs | N/A | | | | | |

Replacement of the Manilla Hall ramp and steps will provide a longer lasting surface and will be designed to current AODA requirements to ensure appropriate area for accessibility.

Reduced repairs by staff will be immediately observed and will reduce repair costs to fix or repair the current wood ramp and stairs.

Risk to the Township if Expenditure Not Included in Budget:

Eventually the stairs and ramp will become unsafe and will require replacement. Rescheduling of events would likely result in lost rental revenue. Failure could also result in physical injury if a person is on the ramp or stairs when the failure occurs. This would likely result in an insurance claim to the Township.

Department:IT DepartmentProject Name:IT Device ReplacementsSubmitted By:Wayne WardProject Start Year:2025

Project Description/Justification

Most of the current inventory of computer devices in use by Township staff were purchased in 2019 using the Modernization Funding that the Township of Brock received from the Provincial government.

These devices have a usual life span of around 5-7 years depending on environment, battery life, hours of usage, and other contributing factors.

The Township has an inventory of 55 devices, some have been updated already such as treasury/building/planning and council devices. This accounts for a total of 16 devices.

The devices that should be replaced should be the older model T490 units which is a total of 18 devices.

Staff are recommending that only 8 devices be upgraded in 2025, 16 in 2026 and 16 in 2027, and that Council increase the amount of contributions to IT Reserves to increase the rate of upgrades over the next two years to keep the units spread over a 4 year period.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one-year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> <u>\$</u> | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> <u>\$</u> |
|---------------------------------|-------------------|-------------------|--------------------------|-------------------|-------------------|---------------------------|
| Total Expenditure\$ | 18,600 | 30,000 | 35,000 | | | 83,600 |
| | | | | | | |
| Identified Funding Source | IT Reserve | IT Reserve | IT Reserve | | | IT Reserve |

| Expected Annual Operating Costs | | | |
|--|--|--|--|

To ensure the digital security of the Township it is important to keep all devices updated. This maintains the systems with updates from the software platforms, security platforms and data more secure. This in turn keeps staff from reduced disruption due to device issues.

The purchases of new devices also provide a manufacturer warranty for three years.

Risk to the Township if Expenditure Not Included in Budget:

If devices are not upgraded as they come to end of life there is a greater chance of devices failing and staff not being able to perform their work functions as there are very limited spare devices and software may need to be installed or updated if a spare device is put into service.

Reference Materials That May Assist With/Strengthen Business Case:

N/A

Department: Parks, Recreation and Facilities

Project Name: Security System retrofits

Submitted By: Wayne Ward

Project Start Year: 2025

Project Description/Justification

The Township of Brock maintains security systems at a number of facilities. These systems are monitored by cellular systems, which due to changes in bandwidth requirements must be retrofitted from 3G to at minimum LTE coverage.

This requirement affects the following locations:

- Municipal Administrative Building
- Beaverton Town Hall
- Beaverton Thorah Health Centre
- Foster Hewitt Memorial Community Centre
- Beaverton Public Library
- Rick MacLeish Memorial Community Centre
- Cannington Public Library
- Dench Animal Shelter
- Sunderland Memorial Arena
- Sunderland Historical Society
- Sunderland Town Hall

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> | <u>2026</u> | <u>2027</u> | <u>2028</u> | <u>2029</u> | <u>Total</u> |
|-------------------------------|-------------|-------------|-------------|-------------|-------------|--------------|
| | \$ | \$ | \$ | \$ | \$ | \$ |
| <u>Total</u> Expenditure\$ | 2,750 | | | | | |

| Identified Funding Source | Public Building Capital Reserves | | | |
|--|---|--|--|--|
| | | | | |
| | | | | |
| Expected Annual Operating Costs | | | | |

Continued security monitoring at all the noted sites will ensure building security.

Risk to the Township if Expenditure Not Included in Budget:

Increased possibility of damage or loss due to lack of security monitoring.

Department:Parks, Recreation and FacilitiesProject Name:Security Camera installationsSubmitted By:Wayne WardProject Start Year:2025

Project Description/Justification

The Township of Brock has partnered with Durham Regional Police Services for a cost sharing stream through the Ontario CCTV Grant for Police program. "This grant program continues to help expand CCTV systems in more municipalities, as part of the Ontario Guns, Gangs and Violence Reduction Strategy (GGVRS)"

In 2024 this cost sharing program allowed the Township to install CCTV systems at the Beaverton Town Hall, Foster Hewitt Memorial Community Centre and upgrade the system at the Beaverton Splash Pad.

These systems provide security to the public and the Township through both a visual deterrent as well as providing 4K cameras which record data which can be used for insurance claims, police investigations and property maintenance purposes.

Expanding this program to the Cannington Town Hall/Library and the Dench Animal Shelter will provide additional security to these buildings and staff. Both of these locations have been subject to vandalism such as damage to Township Bylaw vehicles and the Town Hall building. The installation at the Dench Animal Shelter will also allow for coverage into the parking area and park entrances where we continue to have issues with vehicles operating dangerously in the parking lot and accessing the park after hours causing damage to the property along with the historical society buildings located in MacLeod Park.

Future Forecast for This Expense Line (Is it required on an ongoing basis or is it a one year increase):

| | <u>2025</u> \$ | <u>2026</u> \$ | <u>2027</u> \$ | <u>2028</u> \$ | <u>2029</u> \$ | <u>Total</u> \$ |
|------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
| Total Expenditure\$ | 10,000 | | | | | |
| | | | | | | |

| Identified Funding Source | Building Capital Reserve and Ontario CCTV Grant (50% cost share) | | | |
|--|--|--|--|--|
| Expected Annual Operating Costs | None | | | |

Installation of CCTV at public buildings provides added security to the staff and to the general public. Through visual deterrents of cameras being visible there is a reduced likelihood of vandalism occurring. The recording functions can provide historical data if vandalism does occur and can assist with police investigations.

Risk to the Township if Expenditure Not Included in Budget:

The Township of Brock has seen a substantial increase in vandalism to buildings and public properties over the past 2-3 years. This vandalism may require staff time, equipment and replacement items due to an occurrence. This takes away funding for improvements to these locations. Without increasing security measures, this trend will likely continue.

Reference Materials That May Assist With/Strengthen Business Case:

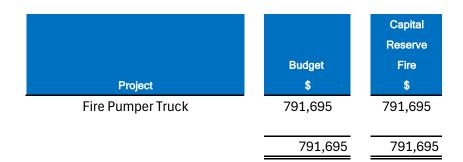

• The **Ontario Closed Circuit Television (CCTV) Grant Program** supports the expansion of CCTV systems in municipalities across the province, as part of <u>Ontario's guns, gangs and violence reduction strategy</u>. The grant supports

police services and communities in increasing public safety. It is available to all municipal and First Nations police services as well as the Ontario Provincial Police.

Township of Brock - 2025 Budget Fire Capital Projects with Proposed Funding Source

Department:Fire & Emergency ServicesProject Name:Fire Department Truck ReplacementSubmitted By:Rick HarrisonProject Start Year:2024Emergency ServicesDepartment Annual Ann

Funding: Fire Capital Reserve – Pre-Budget Approval - November 4, 2024

Project Description/Justification

The Fire Department is scheduled to replace a pumper fire truck, located at the Cannington Fire Station 82 in 2025, as it will be 20 years old.

Staff took a report to Council on November 4, 20024 and received pre-budget approval to purchase an in-stock 2024 Spartan FC-94 custom cab pumper fire truck from Dependable Emergency Vehicles for \$778,000 (plus taxes).

The truck has been ordered and it is anticipated to be received in late 2024 or early 2025.

The truck is being funded by the Fire Capital Reserve and the old pumper truck will be sold and the funds placed in the Fire Capital Reserve for future purchases.
